WE ARE NOT ASKING YOU FOR A PROXY AND YOU ARE NOT REQUESTED TO SEND US A PROXY

Item 2. Dissenters' Right of Appraisal

Sections 37, 42 and 81 of the Corporation Code enumerates the instances when a stockholder of any corporation may exercise his appraisal right. These are:

1. In case any amendment to the articles of incorporation has the effect of changing or restricting the rights of any stockholders or class of shares, or of authorizing preferences in any respect superior to those of outstanding shares of any class;
2. In case of extending or shortening the term of corporate existence;
3. In case of sale, lease, exchange, transfer, mortgage, pledge or other disposition of all or substantially all of the corporate property and assets;
4. In case of merger or consolidation.
5. In case the corporation invests its funds in another corporation or business outside of its primary purpose.

There are no matters to be acted upon in the annual stockholders' meeting that may give rise to the exercise of a dissenter's right of appraisal under the Corporation Code.

If, at any time after this Information Statement has been distributed to the stockholders, an action that may give rise to the right of appraisal is proposed and voted upon at the meeting, then any dissenting stockholder who wishes to exercise his/her appraisal right must make a written demand, within thirty (30) days after the date of the meeting or when the vote was taken, for the payment of the fair market value of his shares.

Item 3. Interest Of Certain Persons In Or Opposition To Matters To Be Acted Upon

- a) No directors or officers, or nominees/candidates for election as a director of the Corporation, or any of their associates have any substantial interest, direct or indirect, by security holdings or otherwise, in any matter to be acted upon in the annual stockholders' meeting other than election to office.
- b) The Company has not received any information from any director who intends to oppose any matter or action to be taken in the annual stockholders' meeting.

A. Management's Discussion and Analysis of Financial Condition and Results of Operations

CENTRAL AZUCARERA DE TARLAC AND SUBSIDIARY

The following Management Discussion and Analysis should be read in connection with the submitted Unaudited Consolidated Financial Statements as at and for the three months ended September 30, 2018 and 2017.

Executive Summary

Central Azucarera de Tarlac, Inc. remains steadfast in its commitment to drive profitability. The 1Q of Fiscal Year 2018-2019 was geared toward strategic sale initiatives and inventory management.

As the first quarter ends and milling operations have yet to commence, Revenues predominantly were derived from tolling and sale of alcohol. As a result, both Net Income and EBITDA significantly improved from the same period last year. Standing at net profitability loss of ₱51.0M and negative EBITDA of ₱16.3M, the Company narrowing its losses during a non-generating revenue quarter. Net income increased by 51% and EBITDA increased by 62%, an interrupted constant growth experienced over the last 3 years during the leanest period of the company operations.

Efficient production caused the decrease in Cost of Goods Sold by 11% resulting to improvement in Gross Profit. Meanwhile, operating expenses for 1QFY 2018-2019 increased by 5% compared to 1QFY 2017-2018 due to inflationary causes affecting committed services in relation to the preparation of the plant for full operations in November 2018.

For the current fiscal year, Central Azucarera de Tarlac, Inc. continuous to carry out the disciplined management of its resources amidst the rising inflation and government mandated sugar import relaxation. Nevertheless, the Company is adequately primed to harness optimum profitability to sustain growth despite challenges in the upcoming milling season.

Review of Operations

Revenues

| REVENUES <i>In Million Pesos</i> | 2018 | 2017 | Growth | |
|--|--------------|--------------|---------------|-------------|
| | | | Amount | % |
| Sugar | .0 | 132.2 | -132.2 | -100% |
| Tolling of Refined Sugar | 20.5 | .0 | 20.5 | 0% |
| Alcohol | 98.2 | 76.4 | 21.7 | 28% |
| Molasses | 40.5 | 5.6 | 34.9 | 628% |
| Industrial services | 10.2 | 9.8 | .4 | 5% |
| TOTAL | 169.3 | 224.0 | -54.7 | -24% |

The Parent Company's revenue accounted for 94% and 96% of the Group's consolidated revenues for the three (3) months ended September 30, 2018 and 2017, respectively.

Revenues for the first quarter ending September 30, 2018 totaled ₱169.3M, lower by 24% or ₱54.7M from the same period of the preceding year. While the Company intensified its efforts to increase revenues by advancing its refining operations and selling of molasses, these are not enough to counter the drop in sugar sales by ₱132.2M.

Cost of Goods Sold

Cost of goods sold decreased by ₱91.6M or 35% this quarter from ₱262.31M to ₱170.7M. The following table summarizes the breakdown of cost of goods sold:

| COST OF GOODS SOLD <i>In Million Pesos</i> | 2018 | 2017 | Increase(Decrease) | |
|--|--------------|--------------|---------------------------|-------------|
| | | | Amount | % |
| Salaries, wages bonuses and other benefits | 14.8 | 13.6 | 1.3 | 9% |
| Repairs & Maintenance | 1.8 | 35.5 | -33.7 | -95% |
| Inventory cost, spare parts and supplies | 106.3 | 159.8 | -53.5 | -33% |
| Depreciation and amortization | 27.8 | 25.3 | 2.6 | 10% |
| Freight and transportation | .7 | .8 | .0 | -4% |
| Security and outside services | 6.6 | 8.9 | -2.2 | -25% |
| Power and steam | 9.4 | 13.1 | -3.7 | -28% |
| Insurance | 1.0 | 1.5 | -.6 | -36% |
| Taxes and licenses | .6 | .6 | .1 | 13% |
| Others | 1.5 | 3.4 | -1.9 | -55% |
| TOTAL | 170.7 | 262.3 | -91.6 | -35% |

- The decrease in Inventory cost, spare parts and supplies by ₱53.5M or 33% is primarily due to the cost of sugar sold last comparative period.
- Depreciation increased by ₱2.6M or 10% as a result of the continuous and strategic acquisition of various equipment to improve mill efficiency.
- Power and steam dropped by ₱3.7M or 28% due to efficient power consumption.

Cost of Tolling Services

Cost of tolling increased by ₱1.9M or 16% this year from ₱11.4M to ₱13.3M. The table below summarizes the breakdown of cost of tolling:

| COST OF TOLLING SERVICES <i>In Million Pesos</i> | 2018 | 2017 | Increase(Decrease) | |
|--|-------------|-------------|---------------------------|------------|
| | | | Amount | % |
| Salaries, wages bonuses and other benefits | 2.2 | 2.2 | .0 | 1% |
| Repairs & Maintenance | 3.7 | 5.5 | -1.8 | -33% |
| Spare parts and supplies | 2.7 | .0 | 2.7 | 0% |
| Depreciation and amortization | 2.9 | 1.8 | 1.1 | 62% |
| Freight and transportation | .5 | .5 | .0 | -7% |
| Security and outside services | .2 | .4 | -.2 | -48% |
| Power and steam | .3 | .2 | .1 | 27% |
| Insurance | .1 | .2 | -.1 | -60% |
| Taxes and licenses | .7 | .6 | .1 | 16% |
| Others | .1 | .1 | .0 | -24% |
| TOTAL | 13.3 | 11.4 | 1.9 | 16% |

- Repairs and maintenance decreased by ₱1.8M or 33% as the Company focuses on capital expenditures that will benefit the refinery operations for extended period.
- Depreciation increased by ₱1.1M or 62% as a result of the strategic acquisition of various equipments.
- Security and outside services decreased by ₱0.2M or 48% due to reduced manpower services requirement for the period.

Operating Expenses

The level of operating expenses increased by ₱5.3M or 24% from ₱21.8M to ₱27.1M. The table below summarizes the breakdown of operating expenses:

| OPERATING EXPENSES <i>In Million Pesos</i> | 2018 | 2017 | Increase(Decrease) | |
|--|-------------|-------------|---------------------------|------------|
| | | | Amount | % |
| Salaries, wages bonuses and other benefits | 7.9 | 6.3 | 1.6 | 26% |

| Others | 2.4 | 1.3 | 1.1 | 83% |
| TOTAL | 27.1 | 21.8 | 5.3 | 24% |

- Salaries, wages and bonuses amplified by ₱1.6M or 26% due to alignment of salary structure levels.
- Repairs and maintenance increased by ₱0.6M or 77% as the Company gears toward the improvement and rehabilitation of non-plant facilities as part of the Company's corporate social responsibility and workforce' gratification.
- Professional fees decreased by ₱0.8M or 18% due to last year's one-time service engagements to accommodate the requirements of various stakeholders.

Cash

The decrease in cash by ₱212.1M or 60% is due from cash used in operating activities of ₱142.0M, ₱56.7M net cash used in investing activities and ₱13.3M net cash used in financing activities.

Receivables

The increase in receivables by ₱106.1M or 12% is due to advances made to suppliers in preparation for the off-milling repair season.

Inventories

The decrease amounting to ₱105.3M or 45% of the reported ending inventory is due to the sale of raw sugar, alcohol and molasses for the quarter.

Trade and other liabilities

The decrease in trade and other liabilities amounting to ₱108.0M or 20% is due to prompt payment of trade payables and settlement of payables.

Total Stockholders' Equity

The reported net loss for period amounting to ₱51.0M wholly contributed to the increase in the Stockholders' Equity of the same amount.

LIQUIDITY & SOLVENCY RATIO

Current Ratio

The current ratio indicates a company's ability to meet short-term debt obligations. The Company's current ratio has improved because of increased in cash levels, receivables and inventory.

Asset to Equity Ratio

The asset to equity ratio indicates the relationship of the total assets of the company to its stockholder's equity. The Company's assets have been slightly financed more by debt than equity as a result of the acquisition of the Company and its subsidiary.

Debt to Equity Ratio

Debt-to-Equity ratio is the ratio of total liabilities of the company to its stockholder's equity. The Debt to Equity ratio slightly diminished due to the increased availment of a loan from a local bank.

Debt Service Coverage Ratio

This ratio is a measure to determine the company's ability to service its outstanding debt. The Company's debt service coverage had improved due to higher earnings during the current year.

| LIQUIDITY & SOLVENCY RATIO | As of September 30, 2018 | As of June 30, 2018 |

Plans, Commitments, and events that have material impact on the issuer's liquidity

To the best of our knowledge, there are no known trends, demand, commitments, events or uncertainties that will have a material impact on our liquidity.

We do not foresee any event that will trigger direct or contingent financial obligations including default or acceleration of any obligations.

We do not have any material off-balance sheet transactions, arrangements, obligations (including contingent obligations) and other relationship of the company with consolidated entities or other persons created during the reporting period.

We do not see, at this point, any known trends, uncertainties that have had or that are reasonably expected to have a material impact on net sales/revenues/income from continuing operations.

We do not have any elements of income or loss that did not arise from our continuing operations.

We do not see at this point any seasonal aspects that have a material effect on the financial condition or result of operations.

CENTRAL AZUCARERA DE TARLAC AND SUBSIDIARY NOTES TO FINANCIAL STATEMENTS

1. Corporate Information, Status of Operations, Change in Majority Ownership and Authorization for the Issue of the Consolidated Financial Statements

Corporate Information

Central Azucarera de Tarlac (the Parent Company) was incorporated and registered with the Philippine Securities and Exchange Commission (SEC) on June 19, 1927. On January 27, 1976, the Board of Directors and the stockholders approved the extension of the corporate life of the Parent Company for another 50 years. The Parent Company and its wholly owned subsidiary, Luisita Land Corporation (LLC), collectively referred to as "The Group", are engaged in the production of sugar and by products, developing, leasing and selling real properties and other ancillary services.

LLC was incorporated and registered with the SEC on May 11, 1977 primarily for the purpose of developing, leasing and selling real properties. Currently, the subsidiary maintains and operates Luisita Industrial Park (LIP), Luisita Business Park (LBP) and Las Haciendas de Luisita (LHDL) in Tarlac and provides water distribution and wastewater treatment services to locators in LIP and residents of LHDL.

The registered office address and place of business of the Parent Company is San Miguel, Tarlac City.

2. Basis of Preparation and Statement of Compliance

Basis of Preparation

The consolidated financial statements have been prepared using historical cost basis, except for land under "Property, plant and equipment (PPE)" account that has been measured at revalued amount, "Investment property" and investment in listed shares of stock under "Available-for-sale (AFS) financial assets" account that have been measured at fair value. The consolidated financial statements are presented in Philippine peso (Peso) unit, which is the Group's functional and presentation currency. All amounts are rounded to the nearest Peso, except when otherwise indicated.

The consolidated financial statements provide comparative information in respect of the previous periods.

Statement of Compliance

The consolidated financial statements have been prepared in accordance with Philippine Financial Reporting Standards (PFRSs).

Basis of Consolidation

The consolidated financial statements include the financial results of the Parent Company and its subsidiary. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Group controls an investee if, and only if, the Group has:

- power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)
- exposure, or rights, to variable returns from its involvement with the investee
- the ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement(s) with the other vote holders of the investee;
- rights arising from other contractual arrangements; and
- the Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the consolidated financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognizes the related assets (including goodwill), liabilities, non-controlling interest and other components of equity, while any resultant gain or loss is recognized in statements of income. Any investment retained is recognized at fair value.

The consolidated financial statements comprise the financial statements of the Parent Company and its subsidiary.

3. Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year except for the adoption of the following new, amended and improvements to PFRSs, Philippine Accounting Standards (PAS) and Philippine Interpretations from International Financial Reporting Interpretations Committee (IFRIC) which are effective for annual periods beginning July 1, 2017.

Amendments to PFRS 12, Disclosure of Interests in Other Entities - Clarification of the Scope of the Standard (Part of Annual Improvements to PFRSs 2014 - 2016 Cycle)

The amendments clarify that the disclosure requirements in PFRS 12, other than those relating to summarized financial information, apply to an entity's interest in a subsidiary, a joint venture or an associate (or a portion of its interest in a joint venture or an associate) that is classified (or included in a disposal group that is classified) as held for sale.

These amendments did not have any impact on the consolidated financial statements as the Group does not have any interest in other entities that is classified as held for sale.

Amendments to Philippine Accounting Standards (PAS) 7, Statement of Cash Flows - Disclosure Initiative

The amendments require entities to provide disclosure of changes in their liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses).

The Group presented the required disclosures of these amendments in Note 31. As allowed by the transition requirement, no comparative figures are shown.

Amendments to PAS 12, Income Taxes - Recognition of Deferred Tax Assets for Unrealized Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions upon the reversal of the deductible temporary difference related to unrealized losses. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

These amendments did not have any impact on the consolidated financial statements as the Group does not have any unrealized losses requiring similar nature gains for it to be deductible for tax purposes.

New Accounting Standards, Interpretation and Amendments to Existing Standards Effective Subsequent to June 30, 2018

Standards and interpretation issued but not yet effective up to the date of issuance of the Group's financial statements are listed below. The Group intends to adopt these standards and interpretation when they become effective. Except as otherwise indicated, the Group does not expect the adoption of these new and amended standards, improvements to PFRSs and new interpretation to have significant impact on the consolidated financial statements.

PFRS 15, Revenue from Contracts with Customers

PFRS 15 establishes a new five-step model that will apply to revenue arising from contracts with customers. Under PFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The principles in PFRS 15 provide a more structured approach to measuring and recognizing revenue.

The new revenue standard is applicable to all entities and will supersede all current revenue recognition requirements under PFRS. Entities can choose to apply the standard using either a full retrospective approach, with some limited relief provided, or a modified retrospective approach.

The Group is currently assessing the impact of adopting this new standard on its consolidated financial statements.

PAS 28 (Amendments) - Measuring an Associate or Joint Venture at Fair Value

The amendments clarify that an entity that is a venture capital organization, or other qualifying entity, may elect, at initial recognition on an investment-by-investment basis, to measure its investments in associates and joint ventures at FVPL. They also clarify that if an entity that is not itself an investment entity has an interest in an associate or joint venture that is an investment entity, the entity may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate's or joint venture's interests in subsidiaries. This election is made separately for each investment entity associate or joint venture, at the later of the date on which (a) the investment entity associate or joint venture is initially recognized; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent. The amendments should be applied retrospectively, with earlier application permitted.

Amendments to PFRS 4, Insurance Contracts - Applying PFRS 9, Financial Instruments, with PFRS 4

The amendments address concerns arising from implementing PFRS 9, the new financial instruments standard before implementing the new insurance contracts standard. The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying PFRS 9 and an overlay approach. The temporary exemption is first applied for reporting periods beginning on or after January 1, 2018. An entity may elect the overlay approach when it first applies PFRS 9 and apply that approach retrospectively to financial assets designated on transition to PFRS 9. The entity restates comparative information reflecting the overlay approach if, and only if, the entity restates comparative information when applying PFRS 9.

The amendments are not applicable to the Group since the Group does not have any activities related to insurance contracts.

Amendments to PFRS 2, Share-based Payment - Classification and Measurement of Share-based Payment Transactions

The amendments to PFRS 2 address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and the accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled.

On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and if other criteria are met. Early application of the amendments is permitted.

The Group has assessed that the adoption of these amendments will not have any impact on the consolidated financial statements as it does not have any share-based payment transaction.

PFRS 9

PFRS 9 reflects all phases of the financial instruments project and replaces PAS 39, *Financial Instruments: Recognition and Measurement*, and all previous versions of PFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. Retrospective application is required but providing comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions.

The Group is in the process of finalizing its assessment on the impact of the adoption of this standard once it becomes effective.

PAS 40 (Amendments), *Investment Property - Transfers of Investment Property*

The amendments stated that an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. A mere change in management's intentions for the use of a property does not provide evidence of a change in use. The amendments should be applied prospectively to changes in use that occur on or after the beginning of the annual reporting period in which the entity first applies the amendments. Retrospective application is only permitted if this is possible without the use of hindsight.

The Group is currently assessing the impact of adopting this new standard on its consolidated financial statements.

Philippine Interpretation from IFRIC 22, *Foreign Currency Transactions and Advance Consideration*

The interpretation clarifies that in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine a date of the transactions for each payment or receipt of advance consideration. The interpretation may be applied on a fully retrospective basis. Entities may apply the interpretation prospectively to all assets, expenses and income in its scope that are initially recognized on or after the beginning of the reporting period in which the entity first applies the interpretation or the beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the interpretation.

Effective for Fiscal Year 2020

Amendments to PFRS 9, *Prepayment Features with Negative Compensation*

The amendments to PFRS 9 allow debt instruments with negative compensation prepayment features to be measured at amortized cost or fair value through other comprehensive income. Earlier application is permitted.

PFRS 16, *Leases*

PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17, *Leases*. The standard includes two recognition exemptions for lessees - leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset).

Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset. Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments).

The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under PFRS 16 is substantially unchanged from today's accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases.

PFRS 16 also requires lessees and lessors to make more extensive disclosures than under PAS 17. Early application is permitted, but not before an entity applies PFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

The Group is in the process of finalizing its assessment on the impact of the adoption of this standard once it becomes effective.

Amendments to PAS 28, Long-term Interests in Associates and Joint Ventures

The amendments to PAS 28 clarify that entities should account for long-term interests in an associate or joint venture to which the equity method is not applied using PFRS 9. Earlier application is permitted.

Philippine Interpretation IFRIC 23, Uncertainty over Income Tax Treatments

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, *Income Taxes*, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

The Group is in the process of finalizing its assessment on the impact of the adoption of this standard once it becomes effective.

Effective for Fiscal Year 2021

PFRS 17, Insurance Contracts

The standard establishes the principles for the recognition, measurement, presentation and disclosure of Insurance contracts within the scope of the Standard. The objective of is to ensure that an entity provides relevant information that faithfully represents those contracts. This information gives a basis for users of financial statements to assess the effect that insurance contracts have on the entity's financial position, financial performance and cash flows.

Some contracts meet the definition of an insurance contract but have as their primary purpose the provision of services for a fixed fee. Such issued contracts are in the scope of the standard, unless an entity chooses to apply to them PFRS 15 and provided the following conditions are met:

- (a) the entity does not reflect an assessment of the risk associated with an individual customer in setting the price of the contract with that customer;
- (b) the contract compensates the customer by providing a service, rather than by making cash payments to the customer; and

(c) the insurance risk transferred by the contract arises primarily from the customer's use of services rather than from uncertainty over the cost of those services.

The amendments did not have any impact on the consolidated financial statements as the Group does not have any activities related to insurance contracts.

Deferred Effectivity

Amendments to PFRS 10 and PAS 28 - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in PFRS 3, between an investor and its associate or joint venture, is recognized in full. Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the FRSC postponed the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board has completed its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

4. Summary of Significant Accounting and Financial Reporting Policies

Business Combinations and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of PAS 39 is measured at fair value with the changes in fair value recognized in the consolidated statement of income.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in consolidated statement of income.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a cash-generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

Current versus Noncurrent Classification

The Group presents assets and liabilities in the consolidated balance sheet based on current or noncurrent classification.

An asset is current when it is expected to be realized or intended to be sold or consumed in the normal operating cycle or within twelve (12) months after the reporting date, when it is held primarily for the purpose of trading, or cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve (12) months after the reporting date. All other assets are classified as noncurrent.

A liability is current when it is expected to be settled in the normal operating cycle or due to be settled within twelve (12) months after the reporting date, when it is held primarily for trading, or when there is no unconditional right to defer the settlement of the liability for at least twelve (12) months after the reporting date. All other liabilities are classified as noncurrent.

Fair Value Measurement

The Group measures financial instruments such as AFS financial assets and nonfinancial assets such as land carried at revalued amount and investment property, at fair value at each reporting date. Also, fair values of financial instruments measured at amortized cost are disclosed in Note 31.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability, or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs at the close of business on the reporting date. When current bid prices and asking prices are not available, the prices of the most recent transaction provide evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group measures fair value on its land, recognized as property, plant and equipment and investment property and AFS financial assets.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from the date of acquisition and are subject to an insignificant risk of change in value.

Financial Assets

Initial Recognition and Measurement. Financial assets within the scope of PAS 39 are classified as financial assets at fair value through profit or loss (FVPL), loans and receivables, held-to-maturity (HTM) investments and AFS financial assets. The Group determines the classification of its financial assets at initial recognition.

All financial assets are recognized initially at fair value, except for financial assets at FVPL, plus directly attributable transaction costs.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date i.e. the date that the Group commits to purchase or sell the asset.

The Group's financial assets include loans and receivables and AFS financial assets. The Group has no financial assets classified at FVPL and HTM investments as at June 30, 2018 and 2017.

Subsequent Measurement. The subsequent measurement of financial assets depends on their classification as follows:

Loans and Receivables. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortization as well as the losses arising from impairment is included in the "Interest income" account in the consolidated statement of income.

This accounting policy relates to the Group's "Cash and cash equivalents" and "Receivables".

AFS Financial Assets. AFS financial assets include equity securities. Equity investments classified as AFS are those, which are neither classified as held for trading nor designated as financial assets at FVPL.

After initial measurement, AFS financial assets are subsequently measured at fair value with unrealized gains or losses recognized as other comprehensive income in the "Unrealized gain (loss) on available-for-sale financial assets" account, until the investment is derecognized, at which time the cumulative gain or loss is recognized in the "Gain or loss on sale of available-for-sale financial assets" account in the consolidated statement of income, or

determined to be impaired, at which time the cumulative loss is recognized in the consolidated statement of income. Dividends earned on holding AFS equity instruments are recognized in the consolidated statement of income as dividend income when the right of the payment has been established.

AFS financial assets whose fair value cannot be reliably measured are measured at cost less any impairment. If a reliable measure of fair value subsequently becomes available, the asset is measured at that fair value, and the gain or loss is recognized in the consolidated statement of comprehensive income, provided it is not impaired. If a reliable measure ceases to be available, it should thereafter be measured at 'cost', which is deemed to be the fair value on that date. Any gain or loss previously recognized in consolidated other comprehensive income will remain in equity until the asset has been sold, otherwise disposed of or impaired, at which time it should be reclassified to the consolidated statement of income.

This category includes AFS financial assets classified as proprietary shares and investments in listed and unlisted securities.

Impairment of Financial Assets

The Group assesses at each reporting date whether a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred "loss event") and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Assets Carried at Amortized Cost. If there is objective evidence that an impairment loss on assets carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not been incurred) discounted at the financial asset's original effective interest rate or EIR (i.e., the EIR computed at initial recognition). If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current EIR. The carrying amount of the asset is reduced through use of an allowance account. The amount of the loss is recognized in the consolidated statement of income.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are no longer included in a collective assessment of impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognized in the consolidated statement of income. Interest income continues to be accrued on the reduced carrying amount based on the original EIR of the asset. Loans and receivables, together with the associated allowance, are written off when there is no realistic prospect of future recovery and all collateral, if any, has been realized or has been transferred to the Group. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a write-off is later recovered, the recovery is recognized in the consolidated statement of income under "Other income" account.

AFS Financial Assets. The Group treats AFS financial assets as impaired when there is objective evidence that impairment exists.

In the case of equity investments classified as AFS, objective evidence would include a significant or prolonged decline in the fair value of the investment below its cost. 'Significant' is evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value has been below its original cost. If a AFS financial asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortization) and current fair value, less any impairment loss previously recognized in the consolidated statement of income, is transferred from equity to the consolidated statement of income. Reversals in respect of equity instruments classified as AFS are not recognized in the consolidated statement of income.

In the case of AFS equity investments carried at cost, the amount of impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Derecognition of Financial Assets

A financial asset (or, when applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either: (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group's continuing involvement in the asset. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial Liabilities

Initial Recognition and Measurement. Financial liabilities within the scope of PAS 39 are classified as financial liabilities at FVPL and other liabilities at amortized costs. The Group determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognized initially at fair value and in the case of other liabilities at amortized costs, less directly attributable transaction costs.

The Group's financial liabilities consist of other financial liabilities. As at June 30, 2018 and 2017, the Group has no financial liabilities classified as financial liabilities at FVPL and derivatives designated as hedging instruments in an effective hedge.

Other Financial Liabilities. This category pertains to financial liabilities that are not held for trading or not designated as financial liabilities at FVPL upon the inception of the liability. These include liabilities arising from operations and borrowings. Other financial liabilities are recognized initially at fair value and are subsequently carried at amortized cost, taking into account the impact of applying the EIR method of amortization (or accretion) for any related premium, discount and any directly attributable transaction costs. Gains and losses are recognized in the consolidated statement of income when the liabilities are derecognized as well as through the EIR amortization process.

This category includes notes payable and trade and other payables (excluding statutory liabilities).

Financial Guarantees. Financial guarantees are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. The Group does not recognize financial guarantees in the consolidated financial statements until an obligation to pay the liability of another party to the arrangement is established. It is only

disclosed as part of liquidity risk of the Group.

Derecognition. A financial liability is derecognized when the obligation under the liability is discharged or cancelled or has expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of income.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the consolidated balance sheet.

Inventories

Inventories are valued at the lower of cost and net realizable value (NRV). Cost is determined using the weighted average method for raw and refined sugar, alcohol, yeast, molasses and carbon dioxide, and using the moving average method for spare parts and supplies. NRV for raw sugar, alcohol, yeast, molasses and carbon dioxide is the selling price in the ordinary course of business less costs of conversion, marketing and distribution. NRV of spare parts and supplies is the current replacement cost.

Real Estate Held for Sale and Development

Real estate held for sale and development are carried at the lower of cost and NRV. NRV is the selling price in the ordinary course of business, less costs of completion and estimated costs to make the sale. Costs include acquisition cost of land, expenditures for development and improvements of the property and borrowing costs, if any.

Advances to Supplier

Advances to suppliers represent advance payment on goods or services to be purchased in connection with the Group's operations. These are charged against profit or loss as actual receipt of goods or services, which is normally within twelve months or within the operating cycle.

Advances for Land Maintenance

Advances for land maintenance pertains to costs advanced for future land preparation, planting and harvesting.

Property, Plant and Equipment

Property, plant and equipment, except for land, are stated at cost excluding the costs of day-to-day servicing, less accumulated depreciation and amortization and impairment in value, if any. Following initial recognition at cost, land is carried at revalued amount, which is the fair value at the date of the revaluation. Valuations are performed annually which management believes is sufficient enough to ensure that the fair value of revalued assets does not differ materially from its carrying amount.

Any revaluation surplus, net of tax, is credited to the "Revaluation increment" account included in the equity section of the consolidated balance sheet. Revaluation increase, except to the extent that it reverses a revaluation decrease of the same asset previously recognized in the consolidated statement of income, is recognized in the consolidated statement of comprehensive income. A revaluation decrease is recognized in the consolidated statement of comprehensive income, except to the extent that it reverses a revaluation increase of the same asset previously recognized in the consolidated statement comprehensive income is recognized in the consolidated statement of income.

The revaluation surplus included in equity in respect of an item of property, plant and equipment may be transferred directly to retained earnings when the asset is derecognized. This may involve transferring the whole of the surplus when the asset is retired or disposed of. However, some of the surplus may be transferred as the asset is used by the Group. In such a case, the amount of the surplus transferred would be the difference between depreciation

based on the revalued carrying amount of the asset and depreciation based on the asset's original cost. Transfers from revaluation surplus to retained earnings are not made through the consolidated statement of income.

The initial cost of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property, plant and equipment have been put into operations, such as repairs and maintenance and overhaul costs, are normally charged to operations in the period the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property, plant and equipment.

Cost also includes any asset retirement obligation and interest on borrowed funds used, if any. When assets are sold or retired, their costs and accumulated depreciation, amortization and impairment losses, if any, are eliminated from the accounts and any gain or loss resulting from their disposal is included in the consolidated statement of income of such period.

Depreciation and amortization are computed on a straight-line basis over the estimated useful lives of the assets as follows:

| <u>Category</u> | <u>Number of years</u> |
|--------------------------------------|------------------------|
| Machinery and equipment | 5-10 years |
| Agricultural machinery and equipment | 5-7 years |
| Furniture, fixtures and equipment | 5 years |
| Transportation equipment | 5 years |
| Buildings and improvements | 5-15 years |
| Land improvements | 5-15 years |
| Communication and utility systems | 5 years |
| Roads and bridges | 10 years |

The useful life of each of the property, plant and equipment is estimated based on the period over which the asset is expected to be available for use. Such estimation is based on a collective assessment of industry practice and experience with similar assets.

The assets' residual values, useful lives and depreciation and amortization method are reviewed, and adjusted if appropriate, at each financial year-end.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated statement of income in the year the item is derecognized.

Fully depreciated and amortized property, plant and equipment are retained in the accounts until they are no longer in use.

Construction in-progress is stated at cost. This includes cost of construction and other direct costs. Construction in-progress is not depreciated until such time the relevant assets are completed and become available for operational use.

Investment Property

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gain or loss arising from changes in the fair values of investment properties is included in the consolidated statement of income in the period in which they arise, including the corresponding tax effect, if any. Fair values are determined based on an annual evaluation performed by an accredited external appraiser applying a valuation model approved by the International Valuation Standards Committee.

Investment properties are derecognized either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in the consolidated statement of income in the period of derecognition.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. In the case of an owner-occupied property becoming an investment property, previously recognized revaluation surplus is retained until such time that the property is disposed. On subsequent disposal, the revaluation surplus may be transferred to retained earnings; note that this transfer is not made through the consolidated statement of income.

Impairment of Nonfinancial Assets

Property, Plant and Equipment, Advances to Suppliers and Advances for Land Maintenance

The Group assesses at each reporting date whether there is an indication that these non-financial assets may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount. The asset's or cash generating unit's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset. Any impairment loss is recognized in the consolidated statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. The increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income unless the asset is carried at revalued amount, in which case, the reversal is treated as a revaluation increase. After such a reversal, the depreciation and amortization charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Goodwill

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of the CGUs, to which the goodwill relates. Where the recoverable amount of the CGUs is less than their carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods. The Group performs impairment test of goodwill annually (as at June 30) or when an impairment indicator exists.

Customers' Advances

Customers' advances are recognized in "Trade and other payables" when cash is received from customers for services to be rendered or for goods to be delivered in the future.

Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Equity

Capital Stock

Capital stock is measured at par value for all shares issued. Incremental costs incurred directly attributable to the issuance of new shares are shown in equity as deduction from proceeds, net of tax.

Retained Earnings

The amount included in retained earnings includes accumulated profits attributable to the Group's equity holders and reduced by dividends. Dividends are recognized as a liability and deducted from equity when they are approved by the Group's stockholders. Dividends for the year that are approved after the reporting date are dealt with as an event after the reporting date. Retained earnings may also include effect of changes in accounting policy as may be required by the standard's transitional provisions.

Retained earnings are appropriated for any plan of business expansion. When the appropriation is no longer needed, it is reversed.

Revaluation Increment

Revaluation increment consists of the revaluation adjustment made on its property, plant and equipment being carried at revalued amount, net of tax.

Treasury Shares

The Group's equity instruments which are reacquired (treasury shares) are recognized at cost and deducted from equity. No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancellation of the Group's own equity instruments. Any difference between the carrying amount and the consideration is recognized in the "Additional paid-in capital" account in the consolidated balance sheet.

Revenue

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Sales are measured at the fair value of the consideration received, net of discounts and returns. The Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as a principal or agent. The Group has concluded that it is acting as principal in all of its revenue arrangements.

The following specific recognition criteria must also be met before revenue is recognized:

Sale of Sugar. Sale of sugar is recognized upon transfer of quedans and/or issuance of a sugar release order in the name of the customer which represents ownership title over the sugar.

Sale of By-Products. Sale of by-products, which includes alcohol, carbon dioxide and yeasts, is recognized upon shipment or delivery and acceptance by the customers. Sale of by-products is presented in the consolidated

statement of income under “Sale of sugar and by products” line item.

Tolling Fee. Revenue is recognized when services have been rendered.

Industrial Services. Revenue from industrial services, which include water and wastewater treatment services and locator fees are recognized as the services are rendered.

Sale of Real Estate. Revenue from sale of real estate is accounted for using the full accrual method. The Group assesses whether it is probable that the economic benefits will flow to the Group when the contract price is collectible. Collectability of the contract price is demonstrated by the buyer’s commitment to pay, which is supported by the buyer’s initial and continuing investments that motivate the buyer to honor its obligation. Collectability is also assessed by considering factors such as collections and credit standing of the buyer.

The Group recognizes revenue in full when the buyer has paid 25% of the selling price for property sold. The Group determines that the significant risks and rewards of the property sold are transferred to the buyer at this point.

Nonrefundable payments by customers are recognized as other income.

For income tax purposes, full recognition is applied when more than 25% of the selling price has been collected in the year of sale. Otherwise, the installment method is applied.

Interest Income. Revenue is recognized as the interest accrues, taking into account the effective yield on the asset.

Other Income. This includes revenue recognized when earned from sources other than the normal business operations of the Group.

Expenses

Cost of Goods Sold and Tolling Services.

These are the direct and allocated indirect costs that are incurred upon processing of the Group’s products and rendering of the Group’s tolling services. These are recognized when the related goods are sold and the related services are rendered.

Cost of Industrial Services.

Costs that are directly related to water and wastewater treatment services and are recognized when incurred.

Cost of Real Estate Sales.

Costs from the sale of real estate are recognized when the buyer makes a down payment upon which the significant risks and rewards of the land are transferred.

Operating Expenses.

These are expenses that are related to cost of administering and selling functions of the Group. These expenses are recognized in the Group’s books when incurred.

Income Taxes

Current Income Tax.

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Deferred Income Tax.

Deferred income tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- when the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences and carryforward benefits of unused tax credits from excess minimum corporate income tax (MCIT) over regular corporate income tax and net operating loss carryover (NOLCO), to the extent that it is probable that sufficient future taxable profits will be available against which the deductible temporary differences and carryforward benefits of unused tax credits and tax losses can be utilized except:

- when the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and sufficient future taxable profits will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that sufficient future taxable profits will allow the deferred income tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred income tax relating to items recognized outside the statement of income is recognized outside the statement of income. Deferred income tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred income tax assets and liabilities are offset, if a legally enforceable right exists to offset current tax assets against current tax liabilities and deferred income taxes relate to the same taxable entity and the same tax authority.

Value-added Tax (VAT).

Revenue, expenses and assets are recognized net of the amount of VAT, except:

- where the VAT incurred on a purchase of assets or services is not recoverable from the tax authority, in which case the VAT is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables that are stated with the amount of VAT included.

The net amount of VAT recoverable from, or payable to, the tax authority is included as part of "Other current assets" or "Trade and other payables" accounts, respectively, in the consolidated balance sheet.

Enactment of New Tax Law. Republic Act No. 10963 or the Tax Reform for Acceleration and Inclusion Act (TRAIN) was signed into law on December 9, 2017 and took effect January 1, 2018. Although the TRAIN changes existing tax law and includes several provisions that generally affect businesses, the same did not have any significant impact on the consolidated financial statements.

Operating Leases

Leases where the lessor retains substantially all the risks and rewards of ownership are classified as operating leases. Payments made under operating leases are recognized in the statement of income on a straight-line basis over the period of the lease.

The determination of whether an arrangement contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after the inception of the lease only if one of the following applies:

- (a) there is a change in contractual terms, other than a renewal or extension of the arrangement;
- (b) a renewal option is exercised or extension is granted, unless that term of the renewal or extension was initially included in the lease term;
- (c) there is a change in the determination of whether fulfillment is dependent on a specified asset; or
- (d) there is a substantial change to the asset.

When a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment for scenarios (a), (c) or (d) above, and at the date of renewal or extension period for scenario (b).

When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognized.

Retirement Cost

The Parent Company has a funded, noncontributory defined benefit retirement plan, covering substantially all of its permanent employees. The Subsidiary does not have a formal retirement plan. In this case, employees who will qualify for retirement will be paid the minimum retirement under Republic Act 7641. Retirement expense is actuarially determined using the projected unit credit method. This method reflects discount rate, salary increase and average working lives of employees to the date of valuation. Retirement benefit costs comprise the following:

- service cost,
- net interest on the net defined benefit liability or asset, and
- remeasurements of net defined benefit liability or asset.

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the consolidated statement of income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in consolidated other comprehensive income (OCI) in the period in which they arise. Remeasurements are not reclassified to the consolidated statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund (other than non-transferable financial instruments issued by the reporting entity). Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a pre-tax discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of plan assets is higher than the present value of defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds

from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditures required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they are incurred. Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

Segment Information

For management purposes, the Group is organized and managed separately according to the nature of the business. These operating businesses are the basis upon which the Group reports its segment information presented in Note 6 to the consolidated financial statements.

An operating segment is a component of an entity:

- (a) that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity);
- (b) with operating results regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance; and
- (c) for which discrete financial information is available.

Earnings Per Share (EPS)

Earnings per share is computed by dividing the net income attributable to equity holders of the Group by the weighted average number of shares outstanding during the year adjusted to give retroactive effect to any stock dividends declared during the year.

Basic earnings per share is calculated by dividing the net income attributable to equity holders of the Group for the year by the weighted average number of common shares outstanding during the year.

Diluted earnings per share is computed in the same manner, adjusted for the effect of any potential dilutive shares. As the Group has no dilutive potential common shares outstanding, basic and diluted EPS are the same.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed in the notes to the consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

Events after the Reporting Date

Events after the reporting date that provide additional information about the Group's financial position at the reporting date (adjusting events), are reflected in the consolidated financial statements. Events after the reporting date that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

5. Summary of Significant Accounting Judgments, Estimates and Assumptions

The consolidated financial statements prepared under PFRSs require management to make judgments, estimates and assumptions, that affect the amounts reported in the consolidated financial statements and related notes. Future events may occur which will cause the judgments and assumptions used in arriving at the estimates to change. The effect of any change in judgments, estimates and assumptions are reflected in the consolidated

financial statements as they become reasonably determinable.

Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The following items are those matters which the Group assess to have significant risks arising from judgements and estimation uncertainties.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

Classification of Property. The Group determines whether a property is classified as real estate held for sale and development, investment property or property plant and equipment based on the following:

Real estate held for sale includes land developed into a first class residential subdivision and an industrial community. Real estate held for development pertains to land that is still undeveloped.

Investment property comprises land which is not occupied for use by, or in the operations of, the Group, nor for sale in the ordinary course of business, but are held primarily for capital appreciation.

Property, plant and equipment is held for use in the supply of goods or services or for administrative purposes.

Contingencies. The Group's estimate of the probable costs for the resolution of claims and proceedings has been developed in consultation with outside counsel handling defense in these matters and is based upon an analysis of potential results. Management and its legal counsels believe that the Group has substantial legal and factual bases for its position and are of the opinion that losses arising from these legal actions, if any, will not have a material adverse impact on the Group's financial position and results of operations. It is possible, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of strategies relating to these proceedings. Management assessed that the likelihood that any liability arising from such legal actions is remote, hence, no provision for liability has been recognized in the consolidated financial statements.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Allowance for Doubtful Accounts

Allowance for doubtful accounts is determined through the specific identification. Through this method, the Group evaluates the information available that certain debtors are unable to meet their financial obligations. In this case, management uses judgment, based on the best available facts and circumstances, including but not limited to, the length of relationship with the debtor and the debtor's current credit status based on third party credit reports and known market factors, to record specific reserves for debtors against amounts due to reduce receivable amounts to expected collection. This specific reserve is re-evaluated and adjusted as additional information received affects the amounts estimated. The amounts and timing of recorded provision for doubtful accounts for any period would differ if the Group made different assumptions or utilized different estimates.

Provisions for doubtful accounts recognized in 2018 and 2017 amounted to ₱1.2 million, and ₱0.4 million, respectively. The allowance for doubtful accounts on receivable amounted to ₱9.2 million and ₱9.1 million as at June 30, 2018 and 2017, respectively. The carrying amounts of receivables as at September 30, 2018 and June 30, 2018 amounted to ₱1,027.4 million and ₱921.3 million, respectively (see Note 8).

Allowance for Inventory Obsolescence. The Group provides allowance for inventories whenever NRV of inventories becomes lower than cost due to damage, physical deterioration, obsolescence, changes in price levels or other causes. The allowance account is reviewed on a monthly basis to reflect the accurate valuation in the financial records. Inventories identified to be obsolete and unusable are written-off and charged as expense for the period.

Provision for inventory obsolescence amounting to ₱0.6 million as at September 30, 2018 and June 30, 2018. The carrying amounts of inventories as at September 30, 2018 and June 30, 2018 amounted to ₱130.4 million and ₱235.7 million, respectively (see Note 9).

Impairment of AFS Financial Assets. The Group treats AFS financial assets as impaired when there has been a significant or prolonged decline in the fair value below its costs or other objective evidence of impairment exists. The determination of what is “significant” or “prolonged” requires judgment. The Group generally treats a decline of 20% or more of the original cost of investments as “significant”, and a period greater than six months as “prolonged”. In addition, the Group evaluates other factors including normal volatility in share prices for quoted securities and the future cash flows and discounted factors for unquoted securities.

If assumptions are made regarding the duration and extent to which the fair value is less than cost, the Group would suffer an additional loss representing the write down of cost to its fair value.

No provision for impairment of AFS financial assets was recognized in 2018, 2017 and 2016. The carrying amounts of AFS financial assets as at September 30 and June 30, 2018 amounted to ₱173.9 million.

NRV of Real Estate held for Sale and Development

The Group provides allowance for decline in value of real estate inventories whenever NRV of inventories becomes lower than cost due to damage, physical deterioration, change in price levels or other causes. Estimates of NRV are based on the most realizable evidence available at the time the estimates are made, of the amount the inventories are expected to realize.

There was no allowance for decline in real estate inventory value in 2018 and 2017. The carrying amounts of real estate inventories as at September and June 30, 2018 amounted to ₱988.4 million .

Revalued Amount of Land under Property, Plant and Equipment and Fair Value of Investment Property

The Group has property, plant and equipment and investment property carried at revalued amount and fair value, respectively. These consist of land which is being valued by reference to market using comparable prices adjusted for specific market factors such as location and condition of the property. The Group engaged an external appraiser to determine revalued amount and fair value as at June 30, 2018 and 2017.

The methods and significant assumptions used by the appraiser in estimating fair values of land are discussed in Note 15. The revalued amount of land under property, plant and equipment as at September and June 30, 2018 amounted to ₱810.6 million. The fair value of land under investment property amounted to ₱0.2 billion in September 30 and June 30, 2018.

Estimated Useful Lives of Property, Plant and Equipment

The Group estimates the useful lives of property, plant and equipment based on the period over which the property, plant and equipment are expected to be available for use. The estimated useful lives of the property, plant and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the property, plant and equipment. In addition, the estimation of the useful lives of property, plant and equipment is based on the collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future financial performance could be materially affected by changes in the estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of the property, plant and equipment would increase the recorded expenses and decrease the noncurrent assets.

There were no changes in the estimated useful lives of property, plant and equipment in 2018 and 2017. The carrying values of property, plant and equipment carried at cost as at September 30 and June 30, 2018 amounted to ₱598.6 million and ₱565.6 million, respectively.

Impairment of Nonfinancial Asset

The Group assesses whether there are any indicators of impairment for property plant and equipment advances to suppliers and advances for land maintenance whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The factors that the Group considers important which could trigger an impairment review include the following:

- Significant underperformance relative to expected historical or projected future operating results;
- Significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- Significant negative industry or economic trends.

In determining the present value of estimated future cash flows expected to be generated from the continued use of the assets, the Group is required to make judgments and estimates that can materially affect the consolidated financial statements.

There were no provision for impairment losses recognized in 2018 and 2017. The fair values of land under property plant and equipment as at September 30 and June 30, 2018 amounted to ₱810.6 million. The carrying amounts of property, plant and equipment carried at cost as at September 30 and June 30, 2018 amounted to ₱598.6 million and ₱565.6 million, respectively. The carrying amounts of advances to supplier and advances for land maintenance as at September 30 and June 30, 2018 amounted to ₱391.5 million and ₱380.6 million, respectively.

Estimating Impairment of Goodwill

The Group performs impairment review on goodwill annually, or more frequently if events or changes in circumstances indicate that the carrying amount may be impaired. This requires an estimation of the value in use of the CGU to which goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the CGU and to make use of a suitable discount rate to calculate the present value of those future cash flows.

During the year ended June 30, 2018, the Group recognized impairment loss amounting to ₱199.7 million. As at June 30, 2018 and 2017, goodwill amounted to ₱502.4 million and ₱702.1 million, respectively.

Deferred Income Tax Assets

The Group reviews the carrying amount of deferred income tax assets at each reporting date and reduces its amount to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that sufficient future taxable profit will allow the deferred income tax asset to be recovered.

The Group's deferred income tax assets arising from temporary differences as at June 30, 2018 and 2017 amounted to ₱14.9 million and ₱26.1 million, respectively

Retirement Asset

The determination of the obligation and cost for retirement is dependent on the selection of certain assumptions determined by management and used by actuaries in calculating such amounts. These include discount rate, turnover rate, mortality rate, salary increase rate and future retirement benefits increase. Due to the complexity of the valuation, the underlying assumptions, and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. While the Group believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the retirement obligation. The assumptions used are disclosed in Note 25.

6. Segment Information

The Group's operating businesses are organized and managed according to the nature of the products and services marketed, with each segment representing a strategic business unit that offers different products and serves different markets.

The Group has operations only in the Philippines. The Group derives revenues from two main segments as follows:

Sugar and by products

This segment pertains to the production of sugar (raw and refined) and sugar by-products such as molasses, alcohol and carbon dioxide.

Real estate

This segment pertains to developing, leasing and selling real properties and other ancillary services.

| | Sugar and by products | Real Estate | Eliminations | Total |
|----------------------------------|----------------------------------|----------------------------|-----------------------------|----------------------------|
| Revenues | 159,124.37 | 10,196.36 | | 169,320.73 |
| Cost of goods sold and services | 183,941.75 | 6,936.72 | | 190,878.47 |
| Gross income | <u>-24,817.38</u> | <u>3,259.63</u> | <u>.00</u> | <u>-21,557.74</u> |
| Operating expenses | 24,611.21 | 2,499.30 | | 27,110.51 |
| Other income (expenses) | | | | |

Input VAT represents VAT paid to suppliers that can be claimed as credit against the Group's future output VAT liabilities without prescription.

Others include individual insignificant amounts.

12. Goodwill

The Group performed its impairment review of goodwill as at June 30, 2018 and 2017. Based on the impairment review as at June 30, 2018, the carrying value of the CGU, including goodwill, exceeded the recoverable amount by ₱199.7 million, which is calculated through value in use. This was recognized as an impairment loss for the year ended June 30, 2018. As at June 30, 2017, recoverable amount exceeded the carrying value of the CGU, including goodwill, thus, no impairment loss was recognized for the year ended June 30, 2017.

CGU pertains to the Parent Company's investment in LLC. Value in use was derived using cash flow projections based on financial budgets approved by senior management covering a five-year period and the expected realization of the Group's land inventory. Cash flow beyond the five-year period are extrapolated using a 5.00% growth rate. Discount rate applied to the cash flow projections in determining value in use is 11.85% and 10.18% in 2018 and 2017, respectively.

The calculations of value in use of goodwill are most sensitive to the following assumptions:

- a) Discount rates - Discount rates were derived from the Group's weighted average cost of capital and reflect management's estimate of risks within the CGU. This is the benchmark used by the management to assess operating performance and to evaluate future investment proposals. In determining appropriate discount rates, regard has been given to various market information, including, but not limited to, ten-year government bond yield, bank lending rates and market risk premium and country risk premium.
- b) Growth rate estimates - The long-term rate used to extrapolate the budget for the investee companies excludes expansions and possible acquisitions in the future. Management also recognizes the possibility of new entrants, which may have significant impact on existing growth rate assumptions. Management however, believes that new entrants will not have a significant adverse impact on the forecast included in the budget.

15. Land

The fair value of land as at September 30, 2018 and June 30, 2018 amounted to ₱810.5 million. The fair value, categorized as Level 3, is based on valuations determined by an independent appraiser, accredited by the SEC, as of June 30, 2018. The valuation models used by the appraiser are in accordance with that recommended by the International Valuation Standards Council. The current use of the land is its highest and best use.

The fair value of the land is determined using the market data (direct sales comparison) approach. Under this approach, a property's fair value is estimated based on comparing prices paid for comparable properties sold in the market against the subjected property. The weight given to this approach is dependent on the availability of recent confirmed sales of properties considered comparable to the property under appraisal. These sold properties are compared to the subject in key units of comparison. Appropriate adjustments are made for differences between the subject and the comparables, resulting in adjusted sales values for each of the comparable. These adjusted values are then reconciled for a value conclusion by the sales comparison approach.

26. Retirement Asset

Parent Company

The Parent Company maintains a tax-qualified, funded, noncontributory defined benefit retirement plan covering substantially all of its permanent employees. The benefits are based on years of service and compensation during the latest year of employment. The latest retirement valuation was made as at June 30, 2018.

The fund is administered by Luisita Trust Fund (LTF) under the supervision of LTF's Board of Trustees. The Board of Trustees defines the investment strategy as often as necessary, at least annually, especially in the case of significant market developments or changes to the structure of the plan participants. When defining the investment strategy, it takes into account the plans' objectives, benefit obligations and risk capacity. The defined benefit retirement plan meets the minimum retirement benefit specified under Republic Act (RA) No. 7641, Retirement Pay Law.

27. Related Party Transactions

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control or are controlled by or under common control with the Group, including holding companies, subsidiaries and fellow subsidiaries, are related parties of the Group. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Group that gives them significant influence over the enterprise, key management personnel, including directors and officers of the Group and close members

of the family of these individuals, and companies associated with these individuals also constitute related parties. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

Terms and Conditions of Transaction with Related Parties

Outstanding balances of transactions with related parties at year-end are unsecured and settlements are made through offsetting. As at June 30, 2016, the Group has allowance for doubtful accounts relating to amounts covered by related parties. This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.

Transactions with Related Parties

The Group, in the normal course of business, has transactions with related parties.

28. Agreements

Milling Agreements

The Parent Company's milling agreements with various planters provide for a 67.0% and 33.0% sharing between the planters (including related parties) and the Parent Company, respectively, of sugar and molasses produced every crop year. As a consequence of the milling agreements and tolling contracts (for refined sugar) with planters and traders, the Parent Company holds the sugar stock of the planters and traders for safekeeping.

Lease Agreement

In previous years, the Group transferred its main office and entered into an operating lease agreement with FLPC, effective from December 1, 2014 to November 30, 2015. The lease contract includes a clause for the extension of the lease term for an additional period of three years at the option of the lessee subject to mutually acceptable rates, terms and conditions. The Group paid advance rental and security deposit amounting to ₱0.9 million and ₱0.8 million, respectively.

29. Equity

Capital Stock

The authorized capital stock of the Parent Company is 400.0 million shares as at June 30, 2018, with par value of ₱1 per share. The Parent Company's shares of stock were listed in the PSE on April 12, 1977. There was no active trading on the Parent Company's outstanding shares in the PSE until the Philippine SEC issued an order on January 29, 2014 lifting the order of suspension made in 2010 in relation to the registration of and permit to sell the said securities.

On June 15, 2016, the BOD of the Parent Company authorized a ten-for-one stock split to increase the number of shares of stock and decrease the par value that took effect on October 18, 2016.

| | Prior to Amendment | | | After Amendments | | |
|--------------|--------------------|------------------|-----------|--------------------|------------------|-----------|
| | Authorized Capital | Number of Shares | Par Value | Authorized Capital | Number of Shares | Par Value |
| Common Stock | 40,000,000 | 28,254,596 | 10 | 400,000,000 | 282,545,960 | 1 |

The total number of shareholders is 395 as at June 30, 2018.

Retained Earnings

As at June 30, 2018, the balance are as follows:

| | 2018 | 2017 |
|----------------|---------------------|------------|
| Unappropriated | -104,702.61 | 280,932.35 |
| Appropriated | 2,300,000.00 | 200,000.00 |
| | 2,195,297.39 | 480,932.35 |

On June 28, 2018, the BOD reversed previously appropriated retained earnings amounting to ₱200 million. Also on the same date, the BOD approved the appropriation of its retained earnings amounting to ₱2.3 billion in anticipation of the following projects which are expected to happen within the next five years:

- ₱900.0 million for sugar business expansion which will cover the following:
 - intensified leasing of land for the purpose of increasing cane tonnage;
 - investment in logistics, such as additional trucks and trailers to improve delivery time;
 - upgrade of the refinery machineries and more robust yearly repairs; and
 - research and development costs to identify potential areas for improvement to increase cane tonnage to one million.
- ₱500.0 million for rum production which will cover the additional investment needed for bottling and mixing facilities to increase production capacity and costs for brand study.
- ₱900.0 million for ethanol production which will cover the construction of dehydrator equipment to bring alcohol proof grade from 94 to 99 in order to expand its existing ethanol business to petroleum companies in addition to its existing transactions with pharmaceutical companies.

Finally on June 28, 2018, the BOD declared dividends amounting to ₱50.9 million at ₱0.18 per share out of the Group's retained earnings as at March 30, 2018.

Basic/diluted Earnings Per Share

The basic/diluted earnings per share for the years ended September 30, 2018 and June 30, 2018 are computed as follows:

| | As of September 30, 2018 | As of June 30, 2018 |
|---|---|--------------------------------|
| Net Income | -51,023.87 | 583,622.01 |
| Weighted average number of shares | | |
| Issued | 282,545.96 | 282,545.96 |
| Less treasury shares | 7.20 | 7.20 |
| | 282,538.76 | 282,538.76 |
| Basic/diluted earnings per share | -₱0.18 | ₱2.07 |

The Group has no dilutive potential ordinary shares; hence the diluted earnings per share are the same as the basic earnings per share.

There are 720 shares that are in the treasury amounting to ₱7,200 as of September 30, 2018 and June 30, 2018.

30. Fair Value Measurement and Financial Instruments

The following table provides the fair value measurement hierarchy of the Group's assets that are carried at fair value as of June 30, 2018:

| | Fair Value Measurement Using | | | Total |
|-------------------------------------|---|---|---|---------------------|
| | Quoted Prices in Active Markets (Level 1) | Significant Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | |
| Asset Measured At Fair Value | | | | |
| Property, plant and equipment | | | | |
| Land | | | 810,550.40 | 810,550.40 |
| Investment Property | | | 223,561.38 | 223,561.38 |
| AFS Financial assets - quoted | 173,787.54 | | | 173,787.54 |
| | 173,787.54 | .00 | 1,034,111.78 | 1,207,899.32 |

The following are the relevant information and assumptions used in determining the fair value of land:

- *Sale/Asking price per sq. m.* This pertains to the sale/asking price per square meter based on the listing prices of comparable properties.
- *Conditions on sale of comparable properties.* This pertains to the effect of restrictions or conditions that are present in contracts of sale relating to the comparable properties.
- *Physical adjustments.* These pertain to adjustments relating to the superiority or inferiority of the Group's land as regards to location, shape, topography, size, zoning, amenities, and easement for access and utility lines.

The table below summarizes the forgoing statements. It also presents the unobservable inputs used by management in assessing the fair value of land categorized as Level 3. Management believes that this information is beneficial in evaluating the fair value of the land.

| Unobservable Inputs | Amounts or Percentage of Unobservable Inputs | Relationship of Unobservable Inputs to Fair value |
|---|--|---|
| Weighted average value per s.q.m. | P 460 to P 1,000 | The higher the value the higher the fair value |
| Conditions on sale of comparable properties | 25.0% | The more onerous the conditions in contract of sale of comparable properties, the higher the fair value |
| Physical Adjustments | 50.0% | The superiority of the quality of the Company's land, the higher the fair value |

Fair value of all other assets and liabilities approximates their carrying values as of June 30, 2018 and are disclosed in their respective notes. Below are the descriptions of the Company's financial instruments that are carried in the financial statements as at June 30, 2018 and 2017.

Cash and Cash Equivalents, Receivables and Trade and Other Payables

Due to the short-term nature of these financial instruments, their fair values approximate the carrying amounts as of balance sheet date.

AFS Financial Assets

The fair value of the listed AFS financial assets are determined in reference to quoted market bid prices at the close of business on the balance sheet date since these are mostly actively traded in organized financial market. Unlisted common shares of stock are unquoted and there are no other reliable sources of their fair market values, therefore, they are stated at cost.

Notes Payable

The carrying value of notes payable with variable interest rates approximates their fair value because of semi-annual or quarterly resetting of interest rate based on market conditions. The fair values of notes payable with fixed interest rates based on Level 3 are determined based on estimated cash flows with discount rates ranging from 4.8% to 6.0% as at June 30, 2018.

The Group's policy is to recognize transfers into and transfers out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer. There have been no assets and liabilities transferred between Level 1, Level 2 and Level 3 during the period.

31. Financial Risk Management Objectives and Policies

The Group's principal financial instruments include cash, AFS financial assets, notes payable and due from/to related parties. The main purpose of these financial instruments is to finance the Group's operations. The Group has various other financial assets and liabilities such as receivables and trade and other payables, which arise directly from its operations.

The main risks arising from the Group's financial instruments are liquidity risk, credit risk and interest rate risk. The BOD reviews and agrees on the policies for managing each of these risks and these are summarized below:

Liquidity Risk

Liquidity risk is the risk that the Group will not be able to settle or meet its obligations on time or at reasonable prices. The Group uses cash flow approach in managing its liquidity, in this way, funding requirements under normal economic condition are met.

The table below summarizes the maturity profile of the Group's financial liabilities as of September 30, 2018 and June 30, 2018 based on undiscounted payments:

Credit Risk

Credit risk is the risk that counterparty will not meet its obligation under a financial instrument leading to a financial loss. The Group imposes cash basis approach in its sales transaction to lower exposure to credit risk.

With respect to credit risk arising from other financial assets of the Group, which comprise cash in banks and cash equivalents, receivables, and AFS financial assets, exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of these instruments as stated below:

| | As of September 30, 2018 | As of June 30, 2018 |
|-------------------------------|-------------------------------------|--------------------------------|
| Cash and cash equivalents | 143,104.08 | 355,179.30 |

Credit Quality of Financial Assets

The credit quality of financial assets is managed by the Company using high grade and standard grade as internal credit ratings.

High Grade. This pertains to counterparty who is not expected by the Company to default in settling its obligations, thus, credit risk exposure is minimal. This normally includes large prime financial

institutions, companies, government agencies and individual buyers. Credit quality was determined based on the credit standing of the counterparty.

Standard Grade. Other financial assets not assessed as high grade financial assets are included in this category.

Interest Rate Risk

Interest rate risk arises from the possibility that the changes in interest rates will affect the fair value of financial instruments. Interest on financial instruments classified as floating rate is repriced at intervals of less than one year. Interest on financial instruments classified as fixed rate is fixed until the maturity of the instrument.

Capital Management

The Group's primary objective is to ensure that it maintains a strong credit rating and healthy capital ratios to sustain its business and maximize shareholder value. The Group manages its capital structure based on its business requirements and the economic environment. The Group monitors capital using a gearing ratio, which is total debt divided by total debt and equity. Total debt includes notes payable and trade and other payables. Equity includes capital stock, retained earnings, revaluation increment, unrealized cumulative gain on AFS financial assets and treasury stock.

PART I - BUSINESS AND GENERAL INFORMATION

A. Description of Business

Central Azucarera de Tarlac ("Company" or "CAT") was incorporated in 1927 and the Company's life was renewed in 1976. It operates an integrated manufacturing facility that processes sugar and all its by-products. Its business and facilities include the sugar milling and refinery, distillery and carbon dioxide plants located in Barrio San Miguel, Tarlac City. The sugar cane supply is sourced predominately from the Tarlac district and a few in the nearby towns of Pampanga.

The Company, in addition to its sugar processing operations, has a one hundred percent (100%) stake in Luisita Land Corporation ("LLC"), a domestic corporation engaged in developing, leasing, and selling real properties and other ancillary services.

Products and By-Products

Raw and Refined Sugar

The Company's sugar milling and refinery facilities have a capacity of 7,200 tons cane and 8,000 50-kg bags per day, respectively. The sugar cane is initially processed to extract sugar of which 31% represents the company's mill share, 69% belongs to the planters. Most of the raw sugar extracted is further processed in the refinery to produce refined sugar. Tolling fees are collected from customers' upon withdrawal of refined sugar from the Company's inventory. In addition to raw and refined sugar, the mill and refinery produce molasses, a by-product. The molasses produced in the mill is likewise subjected to the planter-miller share of 31% and 69%, respectively.

The mill's sugar sales and the refinery's tolling fees represent approximately 50% and 19%, respectively, of the Company's total revenues. The raw and refined sugars produced are sold to industrial users through traders. The Company operates within 5 to 6 months while the refinery operates between 8 to 9 months with the crop year.

Alcohol

The combined captive molasses of the mill and refinery are processed further in the distillery to produce alcohol. The distillery has a production capacity of about 65,000 gauge liters per day. The various types of alcohol regularly produced and sold are rectified spirits (purified alcohol), absolute alcohol and denatured alcohol. These alcohol products are sold to various reputable distillers of wine, manufacturers of alcoholic beverages and a fraction goes to producers of pharmaceutical products.

In addition to alcohol sales, tolling fees are earned from various distillers whose molasses are processed by the distillery. In the last three years, the distillery's contribution to the Company's operating revenues was between 0.4-3.0%.

Carbon Dioxide

The slops emanating from the distillery are captured by the carbon dioxide plant to produce liquid carbon dioxide. The plant has a capacity of 30,000 kilos per day and operates for 4 to 5 months of the year. Carbon Dioxide sales account for 3% of the Company's total revenues in the last three years and are sold to industrial users.

Industrial Services

The Company, thru LLC, provides property management, water distribution and wastewater treatment series to locators of Luisita Industrial Park and residents of Las Haciendas de Luisita.

Industrial Profile

Before the onset of the 2017-18 season it has been projected that after two consecutive seasons of production deficit the world sugar economy would post a production surplus. Preliminary estimates point to an excess of production over consumption of 8.59 MMT (million metric tons), raw value, from a production deficit of 2.85 MMT in 2016-17 or an increase of 11.44 MMT. The lack of fundamental support (demand) at the back of an 8.6% or 14.58 MMT increase in production generally dampened the world market values the entire 2017-18 season. Prices hovered at around 11 to 14 cents per pound for the raw and 14 to 17 cents per pound for refined sugar, possibly the lowest levels since March 2008. Bearish sentiments rule the world sugar economy as early estimates point to another surplus production for the 2018-19 season, estimated at around 6.74 MMT. This is expected to hike the current consumption ratio from 53.6% to 55.1%. The ending stock for the 2018-19 season is projected to grow by 4.5% or 4.28 MMT to 98.39 MMT. Hereunder is the latest world sugar balance figure:

| | World Sugar Balance (Million tons, raw value) | | | |

The relatively high carry-over stocks from the 2016-17 season and a projected production surplus for the country in the 2017-18, as output was initially placed at 2.38 MMT versus domestic demand of 2.17 MMT, the domestic sugar economy suffered low market values most part of the milling season, from September 2017 to January/February 2018. Refined prices hovered at ₱1,900.00 to slightly over ₱2,000.00 per bag for refined sugar. However, sometime between January to March 2018 the industry leaders came to realize that the initial production estimated may not be attained due the generally unfavorable weather throughout the country. An early indication is when the SRA issued Sugar Order No. 1A sometime in January 2018 that reduced the allocation for the "A" or US quota sugar from 10% to 6% and for the "D" or world market sugar from 10% to only 1% of production. About two months thereafter, the SRA totally eliminated allocation for the "D" or world market sugar when it issued Sugar Order No. 1B in March 2018. Finally, and under Sugar Order No. 9 dated May 2018, the SRA allowed the conversion of any unshipped "D" sugar into "B" or domestic sugar for the purpose of augmenting the local supply. These events triggered the up surge in domestic sugar prices to the point that wholesale market prices for refined reached ₱3,000 per bag and to more than ₱2,100 per bag for the raw sugar in June 2018.

The nation's total sugar output for the 2017-18 season went down by 16.67% or 416,868 metric tons (MT), from 2,500,509 MT to 2,083,641 MT. The generally unfavorable weather conditions that prevailed throughout the season resulted to a lower cane tonnage and sugar recovery. There was also a slight decrease in the total areas planted to cane, from 423,995 hectares to 421,608 hectares. The total canes harvested reached a total of 23,860,924 tons, substantially lower by 14.8% or 4,144,500 tons from the previous year. Sugar recovery also suffered as it dipped by 2.2%, from 1.79 to 1.75 L-Kg per ton cane milled.

The nation's total raw sugar production for the season reached 2,083,641 tons, down by 16.7% from last year's 2,500,509 tons. All of the country's sugar producing posted lower output. Mill district in Mindanao posted the highest combined drop in tonnage of 25.1% or by 1,320,002 tons, from 5,264,070 tons down to 3,944,067 tons. Cane harvest from Panay contracted by 23.0% or 530,732 tons to a total of 1,774,990 tons cane. Eastern Visayas posted a drop in tonnage of 13.20% or by 92,355 tons to 608,571 tons. Slightly lower is the drop in tonnage from Negros of 11.47% or 1,916,795 tons to a total of 14,790,550 tons. The lowest drop in tonnage was posted by the combined tonnage by the mill district in Luzon as it dipped 9.40% or 284,666 tons, from 3,027,412 tons to this year's 2,742,746 tons.

Competition

The Company is one of the almost 30 sugar mills currently operating in the country and is one of the few with integrated operations, from sugar milling, refinery and alcohol distillery under one contiguous facility. Located in Central Luzon, CAT caters to the milling requirement of the sugar cane planters of Tarlac and nearby province of Pampanga.

The total available canes in Central Luzon dropped by 2.5% or 20,558 tons, from 808,617 tons to 788,059 tons. Of the total this year, some 82.4% or 649,578 tons were milled in CAT, while the remaining 138,481 tons were processed by a neighboring mill which is Sweet Crystal.

| CANE TONNAGE - CENTRAL LUZON - CY 2017-18 & CY 2016-17 | | | | | | |
|---|-------------------------|----------------|----------------|---------------|-------------------------|----------------|
| MILLS | TONS CANE MILLED | | | | % SHARE IN TOTAL | |

| Total | 788,059 | 808,617 | -20,558 | -2.54% | 100.00% | 100.00% |

CAT has the distinct advantage of having its own sugar refinery, a capability currently not possessed by its neighboring mills. This being so, CAT remains to be the only major source of easily accessible commercial grade refined sugar to cater to the demands of Central and Northern Luzon. In the last several years, CAT produced approximately 1.0M to 1.2M 50-kilogram bags of commercial grade refined sugar per season, a volume insufficient to meet the demand of its own market especially during off-season months of June to October.

Transactions With and/or Dependence on Related Parties

The Company's transactions with related parties are disclosed in Note 26 (pages 41-43) of the Company's audited financial statements. In addition, the Company's operations are not dependent on its related parties. The Company provides working capital support to its related parties.

Research and Development Spend

CAT spends approximately 0.05-0.10% for product research and development over the last three (3) years. The Company adheres to its core product, sugar, and finds no need to further conduct product research and development. However, it continuously adopts new production technology to which spending is through capital expenditure amounting to ₱100-120M annually.

Government Regulations

Other than the Bureau of Internal Revenue ("BIR") and the Securities and Exchange Commission ("SEC"), the Sugar Regulatory Administration ("SRA") is the government regulatory arm that oversees the operation and administration of the sugar industry. One of the most important functions of the SRA is the allocation of the country's sugar production. The SRA determines the quantity of sugar to be sold in the domestic and foreign markets and likewise, regulates importation of sugar, if deemed necessary. Intermittently, the Company seeks approval from the SRA should sugar product change form from one classification to another. This is dependent on the projected sugar supply and demand at a particular period of time.

Cost and effects of compliance with environmental laws

The Company is compliant with environmental standards set by DENR and is ensured of continued operations. The efforts of CAT to comply with all the regulatory requirements and social obligation are evidenced by the costs and expenses incurred by the Company to ensure that pollution control and environmental standards are upheld.

To date, CAT has incurred between ₱4.0-6.0M annually to maintain its environs safe.

Major Risk in the Business of CAT

The following are the threats and risks that the Company is subjected to:

Operational risk. The Company's main operational threat is the undersupply of sugar cane. Its sources of sugar cane predominately come from Tarlac and the nearby province of Pampanga. Planters who have become beneficial owners of agricultural land have begun to explore or engage in sugar planting. In addition, the Company continuously augments its planters programs, incentives, aids and other services to entice planter/land owners to return to sugar crop propagation and engage CAT for its milling and refinery requirements.

Another notable common operational risk is the breakdown of factory facilities resulting to downtime and leading to decreased production output. To mitigate such risks, the Company conducts its preventive maintenance and repair programs during the off-milling season (June to October) in preparation for an uninterrupted subsequent milling, refinery and distillery operations.

Financial risk. The Company is faced with the high volatility of sugar prices, inherent in the sugar industry since sugar is a commodity product. The profitability margins of the Company may be affected should the sugar prices behave erratically. However, this is countered through CAT's strategic management of costs, inventory and operating expenses during the low and high price seasonality of the industry.

A national threat to the sugar industry is the importation of smuggled sugar. The disadvantageous consequence of this unlawful activity includes the weakening of domestic sugar prices. It affects not only CAT but the also the industry players as well. It likewise impacts the local planters creating an imbalance in the domestic sugar supply. The Company addresses this risk by managing its costs to allow competitive pricing should excess sugar enters the market. Moreover, CAT collaborates with the government agencies such as the Sugar Regulatory Administration (SRA), whose purpose is to protect the domestic sugar players, and participates in other government programs to uphold the progression of the sugar industry in the Philippines.

Hazard risk. Due to its agriculturally-based raw materials, extreme changes in weather conditions greatly affect the quantity and quality of sugar canes. Lower supply from the farmers results to lower sugar production output for the Company. Therefore, CAT is currently implementing its expansion and intensification programs to address any adverse effects of weather and environmental hazards.

B. Properties

The Company owns real estate property consisting of 336.6 hectares located within the Luisita Agro-Industrial Complex in San Miguel, Tarlac City. The property in its entirety is located approximately 3.5 kms west from Luisita Interchange of the SCTEX, or 4.5 kms. East from McArthur Highway/Luisita Business Park; and about 10.0 kms Southeast from the downtown of Tarlac City.

Factory Plants/Buildings Used In Business Operations

The CAT complex is composed of the raw sugar milling, sugar refinery, alcohol distillery and wastewater treatment facilities.

The Raw Sugar Factory. The sugar factory was originally built with a milling capacity of 5,000 tons per day (TCD). Over the years, the Company has continuously upgraded its facilities increasing its capacity and efficiency using the latest available technology. CAT has currently excess capacity and can accommodate up to 1.0M tons cane in its milling and refinery operations.

Refinery Operation. The sugar refinery, which produces the renowned Luisita Sugar, processes refined sugar employing phosphoric acid-lime clarification and decolorization. Its average daily output is 7,500 50-kg. bags of refined sugar.

Alcohol and Ancillary Products. The distillery presently employs several sets of distilling columns with a combined output of 65,000 liters total alcohol with a grade of 189.0 proof. By-products from the distillery are recovered at the CO₂, and yeast plants.

Other Auxiliary and Support Facilities. CAT operates its own electrical substation with electrical distribution system. Other facilities include various shops, laboratory, instrumentation and maintenance equipment.

Water and Wastewater Management. To support CAT's operations, the water treatment facility re-circulates all process cooling water by spray cooling. In addition, the integrated wastewater treatment plant employs an anaerobic digester and 17 facultative lagoons covering an area of 30 hectares, treating the final effluents to irrigate nearby sugarcane fields.

Property Management and Utility Distribution. Thru CAT's subsidiary, LLC, the Company provides property management and water distribution services to locators to commercial and industrial districts within the ten (10) barangays of Tarlac City.

The Company owns all the properties. There are no limitations as to the properties' usage. These are under the Mortgage Trust Indenture as a security to the long-term loan the Company secured from a local bank. Currently, CAT does not lease any of these properties.

C. Legal Proceedings

The Company is currently not under any legal proceedings.

D. Submission of Matters to a Vote of Security Holders

There are no matters submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this report.

PART III - FINANCIAL INFORMATION

A. Management's Discussion and Analysis or Plan of Operation

Executive Summary

Central Azucarera de Tarlac delivered a strong financial performance with a significant increase in profitability. The Company generated an EBITDA of ₱879.7M (Million), with an EBITDA margin of 67% and with an increase of 49% from FY 2017 EBITDA of ₱591.8M. Harnessing its resources, the Company unloaded an idle portion of its land holdings primarily to generate funds to liquidate its ₱2.0B (Billion) loan. This was a calculated strategy of optimization of Company assets to retire the long-term debt ahead of its payment schedule. As a result, CAT will generate continuing yearly benefit of approximately ₱125.0-₱150.0M, which will fuel the Company's further growth and expansion.

FY 2018 Revenues remained at ₱1.3B with a modest increase from last year, despite the volatile sugar prices due to industry's carryover inventory. The Company remained steadfast in managing its costs to uphold a healthy 37% Gross Profit that stood at ₱478.5M. It likewise implemented its comprehensive cost efficiency program, which arrived at a 2% savings in operating expenses.

Central Azucarera de Tarlac concluded the year with a Net Income of ₱583.6M from ₱287.1M in 2017 with an increase 103%. This significantly marks the return to Shareholders doubling its EPS to ₱2.07 from ₱1.02, a clear indication of increased shareholder value from a solid business infrastructure.

Plan of Operation

Outlook for FY 2018-2019

Analysts believe that for the second year in a row the world sugar economy would post an excess of production over consumption. For the 2018-19 season, it is projected that production will expand by 0.6% or 1.04 million metric tons (MMT) to a total of 185.22 MMT on the back of an output gain projected for India of 1.75 MMT higher than the 2017-18 season. Brazil and Cuba are also projected to expand their production by 0.75 MMT and 0.57 MMT respectively. On the other hand, the world sugar consumption is expected to expand by 1.6% or by 2.90 MMT which is in line with the ten-year growth rate of 1.7%. However, the prevailing weak prices may accelerate consumption which is not yet factored in in the estimate. Hereunder is the latest International Sugar Organization (ISO) world sugar balance projection for the 2018-19 season:

| | World Sugar Balance (Million Metric Tons, Raw Value) | | | |
|--|---|----------------|-------------------|-----------------------|
| | 2018-19 | 2017-18 | Change | |
| | | | in MMT | in Percent |
| Production | 185.22 | 184.17 | 1.05 | 0.57% |
| Consumption | 178.47 | 175.57 | 2.89 | 1.65% |
| Surplus/(Deficit) | 6.75 | 8.60 | - | 0.00% |
| Import Demand | 60.17 | 59.05 | 1.13 | 1.91% |
| Export Availability | 62.64 | 59.05 | 3.59 | 6.08% |
| End Stocks | 98.40 | 94.11 | 4.29 | 4.55% |
| Stock/Consumption Ratio, in percent | 55% | 54% | | |

Given the projected world sugar balance for the 2018-19 season that points to another massive surplus following a season with even greater excess of world production over consumption, it could easily be presumed that world market values would remain under pressure for the upcoming season. The weather remains the main short-term driver of output and significant unforeseen climatic calamities may affect sugar harvest in the coming season. However, the level of existing surplus stocks which is estimated at 94.11 MMT or 53.6% of total consumption, is still so high that even multi-million tons of production shortfall from major sugar producing countries can still be mitigated.

In the domestic front, the Sugar Regulatory Administration is projecting a higher output of raw sugar for the 2018-19 season. Current projection points to a total raw sugar production of 2.22 MMT, higher by 6.8% or 0.14 MMT from the previous total of 2.08 MMT. With a carry-over stock of some 0.32 MMT from the 2017-18 season and demand of 2.17 MMT, the available supply will more than sufficient to meet the domestic requirements and the US quota commitment. Proof is that on September 2, 2018, the SRA issued Sugar Order No. 1 mandating the allocation of 95.0% of the nation's raw sugar output to the domestic market. The remaining 5.0% is allocated to the US sugar quota.

| Sugar Classes | Production MMT | % Allocation |
|------------------------------|-----------------------|---------------------|
| "A" or U.S. Market Sugar | 0.11 | 5% |
| "B" or Domestic Sugar Market | 2.12 | 95% |
| "D" or World Sugar Market | - | 0% |
| | 2.23 | 100% |

Recent government policy pronouncement implemented to address the soaring inflation rate in the country, currently at 6.7%, that tend to have negative impact on the sugar industry. On October 1, 2018, the SRA issued Sugar Order No. 2 allowing the importation of an additional 150,000 MT of sugar by any natural or juridical persons that are registered in the SRA as International Sugar Trader. Any eligible importer may import between 2,500 to 15,000 MT of raw or refined sugar. The sugar shipments should arrive in the country on or before December 31, 2018. This importation is on top of the 200,000 MT of importation done under Sugar Order No. 10 dated June 11, 2018.

In the short-term, this could help the government in its effort to lower the high inflation rate. However, this could also push planters away from sugar cane farming should prices dive down to levels unacceptable to them. Should this happen, then the country could revert back to being a net-importer rather than an exporter of excess domestic production. Another, is that the policy encourages end-users, especially industrial ones, to do the importation which could cause an imbalance in the domestic supply and demand equation when not properly regulated. Note that the present policy mandates that the physical shipments of imported sugar should arrive at the country by December 31, 2018, when all the mills and refineries are operating and when harvesting is at or nearing its peak. Consequently, a glut in supply will occur. Given the foregoing, bearish sentiments will probably prevail this coming milling season. Early indications point to a lower price composite than last year.

| Industrial services | 42.7 | 39.2 | 33.3 | 9% | 0% |
| Real estate sale | 1.0 | .0 | 1.0 | 0% | 0% |
| TOTAL | 1,308.8 | 1,304.8 | 1,214.0 | 0% | 7% |

For the Fiscal Year 2017-2018, the gross revenues from the sale of products and services amounted to ₱1,308.8M, slightly higher by ₱4.0M compared with last year's ₱1,304.8M. While sugar production declined due to lower recovery, the volume of tons cane milled increased by 32,436 TC or 5%. The downtrend in the sugar recovery is attributed to the inferior quality of canes harvested brought by unfavorable weather conditions and operational challenges during the season. Meanwhile, prices of alcohol and carbon dioxide both weakened while composite sugar price enjoyed preferential rate posting a 2% increase.

- Sugar sales improved by ₱52.4M or 8% due to a combination of volume and composite price increases.
- Tolling of refined sugar decreased by ₱20.3M or 8% due to lower available raw sugar for refining.
- Lower average selling price of alcohol mainly contributed the reduction of alcohol revenues by ₱23.2M or 8%.
- Carbon dioxide volume and selling price dropped by 42% and 7%, respectively resulted to the decline in carbon dioxide revenues by ₱12.9M or 46%
- Continued volume increases in the water sales resulted to the Subsidiary's revenue growth by ₱3.5M or 9%.

Cost of Goods Sold

Cost of goods sold slightly went up by ₱19.5M or 3% this year from ₱692.3M to ₱711.8M. The following table summarizes the breakdown of cost of goods sold:

| COST OF GOODS SOLD <i>In Million Pesos</i> | 2018 | 2017 | 2016 | Growth % | |
|---|--------------|--------------|--------------|--------------|--------------|
| | | | | 2018 vs 2017 | 2017 vs 2016 |
| Salaries, wages bonuses and other benefits | 68.5 | 61.1 | 48.2 | 12% | 27% |
| Repairs & Maintenance | 89.3 | 67.8 | 98.3 | 32% | -31% |

| TOTAL | 711.8 | 692.3 | 630.0 | 3% | 10% |

- Further appointment of key positions to oversee Company initiatives and continuous regularization of manpower structure caused the salaries and wages to increase by ₱7.4M or 12%.
- Repairs and maintenance grew by ₱21.5M or 32% as the Company remains to intensify capital expenditures that will provide long term benefits.
- Depreciation and amortization increased by ₱12.4M or 14% as a result of continuous focus on spending in strategic capital expenditures
- Power and steam grew by ₱9.6M or 155% due to higher electricity consumption.
- Non-recurring insurance costs were incurred last year, thus decreasing this year's total by ₱4.0M or 46%

Cost of Tolling Services

Cost of tolling moderately decreased by ₱5.5M or 5% this year from ₱102.4M to ₱97.0M. The table summarizes the breakdown of cost of tolling:

| COST OF TOLLING SERVICES <i>In Million Pesos</i> | 2018 | 2017 | 2016 | Growth % | |

Trade and other payables increased by ₱64.2M or 13% from ₱486.8M to ₱551.0M due to strategic cash management efforts.

Current portion of notes payable

Current portion of notes payable increased from ₱772.9M to ₱945.4M or ₱172.5M primarily due to availments of short-term loan from a reputable local bank.

Long term notes payable

Long term notes payable was fully settled during the reporting period from the proceeds of investment property sale.

Total Stockholders' Equity

The increase in Stockholders' Equity of ₱764.0M or 25% is brought about by the reported consolidated net income of ₱583.6M, movements in the revaluation increment, and remeasurements gains on defined benefit liability of ₱251.2M and unrealized cumulative loss on AFS of ₱13.8M .

FY 2017 Review of Operations

Revenues

For the Fiscal Year 2016-2017, the gross revenues from the sale of products and services amounted to ₱1,304.8M, higher by ₱90.8M or 7% from the last year. Despite the unfavorable selling prices this year, the overall achievement is the result of increase in cane tonnage by 17%, better quality of cane milled and the consolidated effort to increase productivity that resulted to higher level of continuity of mill operations of 74% compared to last year's 62%.

- Raw sugar production rose by 24% despite the drop in raw sugar composite price this year contributed to ₱70.1M or 12% increase in raw sugar revenues
- Higher volume of raw sugar available for refining triggered the increase in tolling revenues by 13% or ₱34.3M
- Strategic sale of excess molasses added to the coffers by ₱34.6M
- While average selling price of alcohol increased by 7%, volume sold dipped by 19% resulting to a drop in sales of ₱44.2M or 13%
- 22% decline in carbon dioxide selling price resulted to the decrease in revenues by ₱8.1M.
- Increased water sales volume and price of the Company's subsidiary resulted to an increase of ₱5.9M or 18%

The increase in Stockholders' Equity of ₱637.8M or 28% is brought about by the reported consolidated net income of ₱176.7M, revaluation increment of ₱86.9M and remeasurements gains on defined benefit liability of ₱414.0M.

LIQUIDITY & SOLVENCY RATIO

Current Ratio

The current ratio indicates a company's ability to meet short-term debt obligations. The Company's current ratio has improved because of increased in cash levels, receivables and inventory.

Asset to Equity Ratio

The asset to equity ratio indicates the relationship of the total assets of the company to its stockholder's equity. The Company's assets have been slightly financed more by debt than equity as a result of the acquisition of the Company and its subsidiary.

Debt to Equity Ratio

Debt-to-Equity ratio is the ratio of total liabilities of the company to its stockholder's equity. The Debt to Equity ratio slightly diminished due to the increased availment of a loan from a local bank.

Debt Service Coverage Ratio

This ratio is a measure to determine the company's ability to service its outstanding debt. The Company's debt service coverage had improved due to higher earnings during the current year.

| LIQUIDITY & SOLVENCY RATIO | FY 2018 | FY 2017 |
|---------------------------------------|----------------|----------------|
| Current ratio | 1.77 | 1.98 |
| Asset-to-equity ratio | 1.55 | 2.21 |
| Debt-to-equity ratio | 0.40 | 1.08 |
| Debt Service Coverage Ratio | 0.83 | 0.64 |

Plans, Commitments, and events that have material impact on the issuer's liquidity

To the best of our knowledge, there are no known trends, demand, commitments, events or uncertainties that will have a material impact on our liquidity.

We do not foresee any event that will trigger direct or contingent financial obligations including default or acceleration of any obligations.

We do not have any material off-balance sheet transactions, arrangements, obligations (including contingent obligations) and other relationship of the company with consolidated entities or other persons created during the reporting period.

We do not see, at this point, any known trends, uncertainties that have had or that are reasonably expected to have a material impact on net sales/revenues/income from continuing operations.

We do not have any elements of income or loss that did not arise from our continuing operations.

We do not see at this point any seasonal aspects that have a material effect on the financial condition or result of operations.

Changes in and Disagreements with Accountants On Accounting and Financial Disclosures

There have been no disagreements with the Company's auditor, Sycip Gorres, Velayo and Co., for the last 3 fiscal years on accounting, financial concerns and disclosures in the Financial Statements, which is attached hereto as Exhibit "A".

The consolidated fees, net of VAT billed for the last two fiscal years by the Company's external auditor for the Company's annual financial statements audit were ₱1,200,000 for FYs 2018 and 2017.

The Audit Committee has the function of, among other things, reviewing the performance of the external auditor and of recommending to the Board of Directors the appointment or discharge of external auditors as well as reviewing and approving audit-related and none audit services to be rendered by external auditors.

INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Stockholders
Central Azucarera de Tarlac and Subsidiary
San Miguel, Tarlac City

Opinion

We have audited the consolidated financial statements of Central Azucarera de Tarlac and its subsidiary (the Group), which comprise the consolidated balance sheets as at June 30, 2018 and 2017, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended June 30, 2018, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated balance sheets of the Group as at June 30, 2018 and 2017, and its consolidated financial performance and its consolidated cash flows for each of the three years in the period ended June 30, 2018 in accordance with Philippine Financial Reporting Standards (PFRSs).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Valuation of Land

The Group carries land in its consolidated balance sheet as property, plant and equipment and investment property using the revaluation and fair value model, respectively. Land represents 17.41% of the total consolidated assets of the Group as at June 30, 2018. The determination of the revalued amount and fair value of these parcels of land involves significant management judgments and estimations. The valuation also requires the assistance of external appraiser whose calculations also depend on certain assumptions, such as sales and listing of comparable properties registered within the vicinity and adjustments to sales price based on internal and external factors. Thus, we considered the valuation of land as a key audit matter.

The disclosures relating to land are included in Note 15 to the consolidated financial statements.

Audit Response

We evaluated the capabilities and objectivity of the external appraiser by considering their qualifications, experience and reporting responsibilities. We involved our internal specialist in the review of the methodology and assumptions used in the valuation of land. We assessed the methodology adopted by referencing common valuation models and reviewed the relevant information supporting the sales and listings of comparable properties. We also inquired from the external appraiser the basis of adjustments made to the sales price.

Impairment Testing of Goodwill

Under Philippine Financial Reporting Standards, the Group is required to annually test the amount of goodwill for impairment. As at June 30, 2018, the Group's goodwill attributable to its investment in Luisita Land Corporation amounted to ₱502.4 million, which is net of the impairment loss of ₱199.7 million recognized for the year ended June 30, 2018. These amounts are considered significant to the consolidated financial statements. In addition, management's assessment process requires significant judgment and is based on assumptions, specifically revenue growth rate and discount rate.

The Group's disclosures about goodwill are included in Note 12 to the consolidated financial statements.

Audit Response

We involved our internal specialist in evaluating the methodology and the assumptions used. These assumptions include revenue growth rate and discount rate. We compared the key assumptions used, such as revenue growth rate against the historical performance of Luisita Land Corporation and other relevant external data. We tested the parameters used in the determination of the discount rate against market data. We also reviewed the Group's disclosures about those assumptions to which the outcome of the impairment test is most sensitive; specifically those that have the most significant effect on the determination of the recoverable amount of goodwill.

Other Information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended June 30, 2018, but does not include the consolidated financial statements and our auditor's report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended June 30, 2018 are expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1. Corporate Information and Authorization for the Issuance of the Consolidated Financial Statements

Corporate Information

Central Azucarera de Tarlac (the Parent Company) was incorporated and registered with the Philippine Securities and Exchange Commission (SEC) on June 19, 1927. On January 27, 1976, the Board of Directors and the stockholders approved the extension of the corporate life of the Parent Company for another 50 years. The Parent Company and its wholly owned subsidiary, Luisita Land Corporation (LLC), collectively referred to as “the Group”, are engaged in the production of sugar and by products, developing, leasing and selling real properties and other ancillary services.

As at June 30, 2018, the Parent Company is 71.40% owned by CAT Resource & Asset Holdings, Inc. (CRAHI).

LLC was incorporated and registered with the SEC on May 11, 1977 primarily for the purpose of developing, leasing and selling real properties. Currently, the subsidiary maintains and operates Luisita Industrial Park (LIP), Luisita Business Park (LBP) and Las Haciendas de Luisita (LHDL) in Tarlac and provides water distribution and wastewater treatment services to locators in LIP and residents of LHDL.

The registered office address and place of business of the Parent Company is San Miguel, Tarlac City.

Authorization for the Issuance of the Consolidated Financial Statements

The consolidated financial statements as at and for the three years in the period ended June 30, 2018 were authorized for issue in accordance with a resolution by the Board of Directors (BOD) on October 2, 2018.

2. Basis of Preparation, Statement of Compliance and Basis of Consolidation

Basis of Preparation

The consolidated financial statements have been prepared using historical cost basis, except for land under “Property, plant and equipment (PPE)” account that has been measured at revalued amount, “Investment property” and investment in listed shares of stock under “Available-for-sale (AFS) financial assets” account that have been measured at fair value. The consolidated financial statements are presented in Philippine peso (Peso) unit, which is the Group’s functional and presentation currency. All amounts are rounded to the nearest Peso, except when otherwise indicated.

The consolidated financial statements provide comparative information in respect of the previous periods.

Statement of Compliance

The consolidated financial statements have been prepared in accordance with Philippine Financial Reporting Standards (PFRSs).

Basis of Consolidation

The consolidated financial statements include the financial results of the Parent Company and its subsidiary. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Group controls an investee if, and only if, the Group has:

- power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)
- exposure, or rights, to variable returns from its involvement with the investee
- the ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement(s) with the other vote holders of the investee;
- rights arising from other contractual arrangements; and
- the Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the consolidated financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognizes the related assets (including goodwill), liabilities, non-controlling interest and other components of equity, while any resultant gain or loss is recognized in statements of income. Any investment retained is recognized at fair value.

The consolidated financial statements comprise the financial statements of the Parent Company and its subsidiary.

3. Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year except for the adoption of the following new, amended and improvements to PFRSs, Philippine Accounting Standards (PAS) and Philippine Interpretations from International Financial Reporting Interpretations Committee (IFRIC) which are effective for annual periods beginning July 1, 2017.

Amendments to PFRS 12, Disclosure of Interests in Other Entities - Clarification of the Scope of the Standard (Part of Annual Improvements to PFRSs 2014 - 2016 Cycle)

The amendments clarify that the disclosure requirements in PFRS 12, other than those relating to summarized financial information, apply to an entity's interest in a subsidiary, a joint venture or an associate (or a portion of its interest in a joint venture or an associate) that is classified (or included in a disposal group that is classified) as held for sale.

These amendments did not have any impact on the consolidated financial statements as the Group does not have any interest in other entities that is classified as held for sale.

Amendments to Philippine Accounting Standards (PAS) 7, Statement of Cash Flows - Disclosure Initiative

The amendments require entities to provide disclosure of changes in their liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses).

The Group presented the required disclosures of these amendments in Note 31. As allowed by the transition requirement, no comparative figures are shown.

Amendments to PAS 12, Income Taxes - Recognition of Deferred Tax Assets for Unrealized Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions upon the reversal of the deductible temporary difference related to unrealized losses. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount.

These amendments did not have any impact on the consolidated financial statements as the Group does not have any unrealized losses requiring similar nature gains for it to be deductible for tax purposes.

New Accounting Standards, Interpretation and Amendments to Existing Standards Effective Subsequent to June 30, 2018

Standards and interpretation issued but not yet effective up to the date of issuance of the Group's financial statements are listed below. The Group intends to adopt these standards and interpretation when they become effective. Except as otherwise indicated, the Group does not expect the adoption of these new and amended standards, improvements to PFRSs and new interpretation to have significant impact on the consolidated financial statements.

PFRS 15, Revenue from Contracts with Customers

PFRS 15 establishes a new five-step model that will apply to revenue arising from contracts with customers. Under PFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The principles in PFRS 15 provide a more structured approach to measuring and recognizing revenue.

The new revenue standard is applicable to all entities and will supersede all current revenue recognition requirements under PFRS. Entities can choose to apply the standard using either a full retrospective approach, with some limited relief provided, or a modified retrospective approach.

The Group is currently assessing the impact of adopting this new standard on its consolidated financial statements.

PAS 28 (Amendments) - Measuring an Associate or Joint Venture at Fair Value

The amendments clarify that an entity that is a venture capital organization, or other qualifying entity, may elect, at initial recognition on an investment-by-investment basis, to measure its investments in associates and joint ventures at FVPL. They also clarify that if an entity that is not itself an investment entity has an interest in an associate or joint venture that is an investment entity, the entity may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate's or joint venture's interests in subsidiaries. This election is made separately for each investment entity associate or joint venture, at the later of the date on which (a) the investment entity associate or joint venture is initially recognized; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent. The amendments should be applied retrospectively, with earlier application permitted.

Amendments to PFRS 4, Insurance Contracts - Applying PFRS 9, Financial Instruments, with PFRS 4

The amendments address concerns arising from implementing PFRS 9, the new financial instruments standard before implementing the new insurance contracts standard. The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying PFRS 9 and an overlay approach. The temporary exemption is first applied for reporting periods beginning on or after January 1, 2018. An entity may elect the overlay approach when it first applies PFRS 9 and apply that approach retrospectively to financial assets designated on transition to PFRS 9. The entity restates comparative information reflecting the overlay approach if, and only if, the entity restates comparative information when applying PFRS 9.

The amendments are not applicable to the Group since the Group does not have any activities related to insurance contracts.

Amendments to PFRS 2, Share-based Payment - Classification and Measurement of Share-based Payment Transactions

The amendments to PFRS 2 address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and the accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled.

On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and if other criteria are met. Early application of the amendments is permitted.

The Group has assessed that the adoption of these amendments will not have any impact on the consolidated financial statements as it does not have any share-based payment transaction.

PFRS 9

PFRS 9 reflects all phases of the financial instruments project and replaces PAS 39, *Financial Instruments: Recognition and Measurement*, and all previous versions of PFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. Retrospective application is required but providing comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions.

The Group is in the process of finalizing its assessment on the impact of the adoption of this standard once it becomes effective.

PAS 40 (Amendments), *Investment Property - Transfers of Investment Property*

The amendments stated that an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. A mere change in management's intentions for the use of a property does not provide evidence of a change in use. The amendments should be applied prospectively to changes in use that occur on or after the beginning of the annual reporting period in which the entity first applies the amendments. Retrospective application is only permitted if this is possible without the use of hindsight.

The Group is currently assessing the impact of adopting this new standard on its consolidated financial statements.

Philippine Interpretation from IFRIC 22, *Foreign Currency Transactions and Advance Consideration*

The interpretation clarifies that in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognizes the nonmonetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine a date of the transactions for each payment or receipt of advance consideration. The interpretation may be applied on a fully retrospective basis. Entities may apply the interpretation prospectively to all assets, expenses and income in its scope that are initially recognized on or after the beginning of the reporting period in which the entity first applies the interpretation or the beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the interpretation.

Effective for Fiscal Year 2020

Amendments to PFRS 9, *Prepayment Features with Negative Compensation*

The amendments to PFRS 9 allow debt instruments with negative compensation prepayment features to be measured at amortized cost or fair value through other comprehensive income. Earlier application is permitted.

PFRS 16, *Leases*

PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under PAS 17, *Leases*. The standard includes two recognition exemptions for lessees - leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset).

Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset. Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under PFRS 16 is substantially unchanged from today's accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases.

PFRS 16 also requires lessees and lessors to make more extensive disclosures than under PAS 17. Early application is permitted, but not before an entity applies PFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

The Group is in the process of finalizing its assessment on the impact of the adoption of this standard once it becomes effective.

Amendments to PAS 28, Long-term Interests in Associates and Joint Ventures

The amendments to PAS 28 clarify that entities should account for long-term interests in an associate or joint venture to which the equity method is not applied using PFRS 9. Earlier application is permitted.

Philippine Interpretation IFRIC 23, Uncertainty over Income Tax Treatments

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, *Income Taxes*, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- How an entity considers changes in facts and circumstances

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

The Group is in the process of finalizing its assessment on the impact of the adoption of this standard once it becomes effective.

Effective for Fiscal Year 2021

PFRS 17, Insurance Contracts

The standard establishes the principles for the recognition, measurement, presentation and disclosure of Insurance contracts within the scope of the Standard. The objective of is to ensure that an entity provides relevant information that faithfully represents those contracts. This information gives a basis for users of financial statements to assess the effect that insurance contracts have on the entity's financial position, financial performance and cash flows.

Some contracts meet the definition of an insurance contract but have as their primary purpose the provision of services for a fixed fee. Such issued contracts are in the scope of the standard, unless an entity chooses to apply to them PFRS 15 and provided the following conditions are met:

- (a) the entity does not reflect an assessment of the risk associated with an individual customer in setting the price of the contract with that customer;
- (b) the contract compensates the customer by providing a service, rather than by making cash payments to the customer; and
- (c) the insurance risk transferred by the contract arises primarily from the customer's use of services rather than from uncertainty over the cost of those services.

The amendments did not have any impact on the consolidated financial statements as the Group does not have any activities related to insurance contracts.

Deferred Effectivity

Amendments to PFRS 10 and PAS 28 - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in PFRS 3, between an investor and its associate or joint venture, is recognized in full. Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the FRSC postponed the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board has completed its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

4. Summary of Significant Accounting and Financial Reporting Policies

Business Combinations and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of PAS 39 is measured at fair value with the changes in fair value recognized in the consolidated statement of income.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in consolidated statement of income.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a cash-generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

Current versus Noncurrent Classification

The Group presents assets and liabilities in the consolidated balance sheet based on current or noncurrent classification.

An asset is current when it is expected to be realized or intended to be sold or consumed in the normal operating cycle or within twelve (12) months after the reporting date, when it is held primarily for the purpose of trading, or cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve (12) months after the reporting date. All other assets are classified as noncurrent.

A liability is current when it is expected to be settled in the normal operating cycle or due to be settled within twelve (12) months after the reporting date, when it is held primarily for trading, or when there is no unconditional right to defer the settlement of the liability for at least twelve (12) months after the reporting date. All other liabilities are classified as noncurrent.

Fair Value Measurement

The Group measures financial instruments such as AFS financial assets and nonfinancial assets such as land carried at revalued amount and investment property, at fair value at each reporting date. Also, fair values of financial instruments measured at amortized cost are disclosed in Note 31.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability, or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs at the close of business on the reporting date. When current bid prices and asking prices are not available, the prices of the most recent transaction provide evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group measures fair value on its land, recognized as property, plant and equipment and investment property and AFS financial assets.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from the date of acquisition and are subject to an insignificant risk of change in value.

Financial Assets

Initial Recognition and Measurement. Financial assets within the scope of PAS 39 are classified as financial assets at fair value through profit or loss (FVPL), loans and receivables, held-to-maturity (HTM) investments and AFS financial assets. The Group determines the classification of its financial assets at initial recognition.

All financial assets are recognized initially at fair value, except for financial assets at FVPL, plus directly attributable transaction costs.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date i.e. the date that the Group commits to purchase or sell the asset.

The Group's financial assets include loans and receivables and AFS financial assets. The Group has no financial assets classified at FVPL and HTM investments as at June 30, 2018 and 2017.

Subsequent Measurement. The subsequent measurement of financial assets depends on their classification as follows:

Loans and Receivables. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortization as well as the losses arising from impairment is included in the "Interest income" account in the consolidated statement of income.

This accounting policy relates to the Group's "Cash and cash equivalents" and "Receivables".

AFS Financial Assets. AFS financial assets include equity securities. Equity investments classified as AFS are those, which are neither classified as held for trading nor designated as financial assets at FVPL.

After initial measurement, AFS financial assets are subsequently measured at fair value with unrealized gains or losses recognized as other comprehensive income in the "Unrealized gain (loss) on available-for-sale financial assets" account, until the investment is derecognized, at which time the cumulative gain or loss is recognized in the "Gain or loss on sale of available-for-sale financial assets" account in the consolidated statement of income, or determined to be impaired, at which time the cumulative loss is recognized in the consolidated statement of income. Dividends earned on holding AFS equity instruments are recognized in the consolidated statement of income as dividend income when the right of the payment has been established.

AFS financial assets whose fair value cannot be reliably measured are measured at cost less any impairment. If a reliable measure of fair value subsequently becomes available, the asset is measured at that fair value, and the gain or loss is recognized in the consolidated statement of comprehensive income, provided it is not impaired. If a reliable measure ceases to be available, it should thereafter be measured at 'cost', which is deemed to be the fair value on that date. Any gain or loss previously recognized in consolidated other comprehensive income will remain in equity until the asset has been sold, otherwise disposed of or impaired, at which time it should be reclassified to the consolidated statement of income.

This category includes AFS financial assets classified as proprietary shares and investments in listed and unlisted securities.

Impairment of Financial Assets

The Group assesses at each reporting date whether a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred “loss event”) and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Assets Carried at Amortized Cost. If there is objective evidence that an impairment loss on assets carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset’s carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not been incurred) discounted at the financial asset’s original effective interest rate or EIR (i.e., the EIR computed at initial recognition). If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current EIR. The carrying amount of the asset is reduced through use of an allowance account. The amount of the loss is recognized in the consolidated statement of income.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are no longer included in a collective assessment of impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognized in the consolidated statement of income. Interest income continues to be accrued on the reduced carrying amount based on the original EIR of the asset. Loans and receivables, together with the associated allowance, are written off when there is no realistic prospect of future recovery and all collateral, if any, has been realized or has been transferred to the Group. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a write-off is later recovered, the recovery is recognized in the consolidated statement of income under “Other income” account.

AFS Financial Assets. The Group treats AFS financial assets as impaired when there is objective evidence that impairment exists.

In the case of equity investments classified as AFS, objective evidence would include a significant or prolonged decline in the fair value of the investment below its cost. ‘Significant’ is evaluated against the original cost of the investment and ‘prolonged’ against the period in which the fair value has been below its original cost. If a AFS financial asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortization) and current fair value, less any impairment loss previously recognized in the consolidated statement of income, is transferred from equity to the consolidated statement of income. Reversals in respect of equity instruments classified as AFS are not recognized in the consolidated statement of income.

In the case of AFS equity investments carried at cost, the amount of impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Derecognition of Financial Assets

A financial asset (or, when applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either: (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group's continuing involvement in the asset. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial Liabilities

Initial Recognition and Measurement. Financial liabilities within the scope of PAS 39 are classified as financial liabilities at FVPL and other liabilities at amortized costs. The Group determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognized initially at fair value and in the case of other liabilities at amortized costs, less directly attributable transaction costs.

The Group's financial liabilities consist of other financial liabilities. As at June 30, 2018 and 2017, the Group has no financial liabilities classified as financial liabilities at FVPL and derivatives designated as hedging instruments in an effective hedge.

Other Financial Liabilities. This category pertains to financial liabilities that are not held for trading or not designated as financial liabilities at FVPL upon the inception of the liability. These include liabilities arising from operations and borrowings. Other financial liabilities are recognized initially at fair value and are subsequently carried at amortized cost, taking into account the impact of applying the EIR method of amortization (or accretion) for any related premium, discount and any directly attributable transaction costs. Gains and losses are recognized in the consolidated statement of income when the liabilities are derecognized as well as through the EIR amortization process.

This category includes notes payable and trade and other payables (excluding statutory liabilities).

Financial Guarantees. Financial guarantees are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. The Group does not recognize financial guarantees in the consolidated financial statements until an obligation to pay the liability of another party to the arrangement is established. It is only disclosed as part of liquidity risk of the Group.

Derecognition. A financial liability is derecognized when the obligation under the liability is discharged or cancelled or has expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of income.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the consolidated balance sheet.

Inventories

Inventories are valued at the lower of cost and net realizable value (NRV). Cost is determined using the weighted average method for raw and refined sugar, alcohol, yeast, molasses and carbon dioxide, and using the moving average method for spare parts and supplies. NRV for raw sugar, alcohol, yeast, molasses and carbon dioxide is the selling price in the ordinary course of business less costs of conversion, marketing and distribution. NRV of spare parts and supplies is the current replacement cost.

Real Estate Held for Sale and Development

Real estate held for sale and development are carried at the lower of cost and NRV. NRV is the selling price in the ordinary course of business, less costs of completion and estimated costs to make the sale. Costs include acquisition cost of land, expenditures for development and improvements of the property and borrowing costs, if any.

Advances to Supplier

Advances to suppliers represent advance payment on goods or services to be purchased in connection with the Group's operations. These are charged against profit or loss as actual receipt of goods or services, which is normally within twelve months or within the operating cycle.

Advances for Land Maintenance

Advances for land maintenance pertains to costs advanced for future land preparation, planting and harvesting.

Property, Plant and Equipment

Property, plant and equipment, except for land, are stated at cost excluding the costs of day-to-day servicing, less accumulated depreciation and amortization and impairment in value, if any. Following initial recognition at cost, land is carried at revalued amount, which is the fair value at the date of the revaluation. Valuations are performed annually which management believes is sufficient enough to ensure that the fair value of revalued assets does not differ materially from its carrying amount.

Any revaluation surplus, net of tax, is credited to the “Revaluation increment” account included in the equity section of the consolidated balance sheet. Revaluation increase, except to the extent that it reverses a revaluation decrease of the same asset previously recognized in the consolidated statement of income, is recognized in the consolidated statement of comprehensive income. A revaluation decrease is recognized in the consolidated statement of comprehensive income, except to the extent that it reverses a revaluation increase of the same asset previously recognized in the consolidated statement comprehensive income is recognized in the consolidated statement of income.

The revaluation surplus included in equity in respect of an item of property, plant and equipment may be transferred directly to retained earnings when the asset is derecognized. This may involve transferring the whole of the surplus when the asset is retired or disposed of. However, some of the surplus may be transferred as the asset is used by the Group. In such a case, the amount of the surplus transferred would be the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost. Transfers from revaluation surplus to retained earnings are not made through the consolidated statement of income.

The initial cost of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property, plant and equipment have been put into operations, such as repairs and maintenance and overhaul costs, are normally charged to operations in the period the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property, plant and equipment.

Cost also includes any asset retirement obligation and interest on borrowed funds used, if any. When assets are sold or retired, their costs and accumulated depreciation, amortization and impairment losses, if any, are eliminated from the accounts and any gain or loss resulting from their disposal is included in the consolidated statement of income of such period.

Depreciation and amortization are computed on a straight-line basis over the estimated useful lives of the assets as follows:

| <u>Category</u> | <u>Number of years</u> |
|--------------------------------------|------------------------|
| Machinery and equipment | 5-10 years |
| Agricultural machinery and equipment | 5-7 years |
| Furniture, fixtures and equipment | 5 years |
| Transportation equipment | 5 years |
| Buildings and improvements | 5-15 years |
| Land improvements | 5-15 years |
| Communication and utility systems | 5 years |
| Roads and bridges | 10 years |

The useful life of each of the property, plant and equipment is estimated based on the period over which the asset is expected to be available for use. Such estimation is based on a collective assessment of industry practice and experience with similar assets.

The assets' residual values, useful lives and depreciation and amortization method are reviewed, and adjusted if appropriate, at each financial year-end.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on

derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated statement of income in the year the item is derecognized.

Fully depreciated and amortized property, plant and equipment are retained in the accounts until they are no longer in use.

Construction in-progress is stated at cost. This includes cost of construction and other direct costs. Construction in-progress is not depreciated until such time the relevant assets are completed and become available for operational use.

Investment Property

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gain or loss arising from changes in the fair values of investment properties is included in the consolidated statement of income in the period in which they arise, including the corresponding tax effect, if any. Fair values are determined based on an annual evaluation performed by an accredited external appraiser applying a valuation model approved by the International Valuation Standards Committee.

Investment properties are derecognized either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between disposal proceeds, net of transaction costs and applicable taxes, after considering fair value change at the time of the transaction and the carrying amount of the asset is recognized in the consolidated statement of income in the period of derecognition.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. In the case of an owner-occupied property becoming an investment property, previously recognized revaluation surplus is retained until such time that the property is disposed. On subsequent disposal, the revaluation surplus may be transferred to retained earnings; note that this transfer is not made through the consolidated statement of income.

Impairment of Nonfinancial Assets

Property, Plant and Equipment, Advances to Suppliers and Advances for Land Maintenance

The Group assesses at each reporting date whether there is an indication that these non-financial assets may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount. The asset's or cash generating unit's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset. Any impairment loss is recognized in the consolidated statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the

last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. The increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income unless the asset is carried at revalued amount, in which case, the reversal is treated as a revaluation increase. After such a reversal, the depreciation and amortization charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Goodwill

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of the CGUs, to which the goodwill relates. Where the recoverable amount of the CGUs is less than their carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods. The Group performs impairment test of goodwill annually (as at June 30) or when an impairment indicator exists.

Customers' Advances

Customers' advances are recognized in "Trade and other payables" when cash is received from customers for services to be rendered or for goods to be delivered in the future.

Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Equity

Capital Stock

Capital stock is measured at par value for all shares issued. Incremental costs incurred directly attributable to the issuance of new shares are shown in equity as deduction from proceeds, net of tax.

Retained Earnings

The amount included in retained earnings includes accumulated profits attributable to the Group's equity holders and reduced by dividends. Dividends are recognized as a liability and deducted from equity when they are approved by the Group's stockholders. Dividends for the year that are approved after the reporting date are dealt with as an event after the reporting date. Retained earnings may also include effect of changes in accounting policy as may be required by the standard's transitional provisions.

Retained earnings are appropriated for any plan of business expansion. When the appropriation is no longer needed, it is reversed.

Revaluation Increment

Revaluation increment consists of the revaluation adjustment made on its property, plant and equipment being carried at revalued amount, net of tax.

Treasury Shares

The Group's equity instruments which are reacquired (treasury shares) are recognized at cost and deducted from equity. No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancellation of the Group's own equity instruments. Any difference between the carrying amount and the consideration is recognized in the "Additional paid-in capital" account in the consolidated balance sheet.

Revenue

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Sales are measured at the fair value of the consideration received, net of discounts and returns. The Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as a principal or agent. The Group has concluded that it is acting as principal in all of its revenue arrangements.

The following specific recognition criteria must also be met before revenue is recognized:

Sale of Sugar

Sale of sugar is recognized upon transfer of queadans and/or issuance of a sugar release order in the name of the customer which represents ownership title over the sugar.

Sale of By-Products

Sale of by-products, which includes alcohol, carbon dioxide and yeasts, is recognized upon shipment or delivery and acceptance by the customers. Sale of by-products is presented in the consolidated statement of income under "Sale of sugar and by products" line item.

Tolling Fee

Revenue is recognized when services have been rendered.

Industrial Services

Revenue from industrial services, which include water and wastewater treatment services and locator fees are recognized as the services are rendered.

Sale of Real Estate

Revenue from sale of real estate is accounted for using the full accrual method. The Group assesses whether it is probable that the economic benefits will flow to the Group when the contract price is collectible. Collectability of the contract price is demonstrated by the buyer's commitment to pay, which is supported by the buyer's initial and continuing investments that motivate the buyer to honor its obligation. Collectability is also assessed by considering factors such as collections and credit standing of the buyer.

The Group recognizes revenue in full when the buyer has paid 25% of the selling price for property sold. The Group determines that the significant risks and rewards of the property sold are transferred to the buyer at this point.

Nonrefundable payments by customers are recognized as other income.

For income tax purposes, full recognition is applied when more than 25% of the selling price has been collected in the year of sale. Otherwise, the installment method is applied.

Interest Income

Revenue is recognized as the interest accrues, taking into account the effective yield on the asset.

Other Income

This includes revenue recognized when earned from sources other than the normal business operations of the Group.

Expenses

Cost of Goods Sold and Tolling Services

These are the direct and allocated indirect costs that are incurred upon processing of the Group's products and rendering of the Group's tolling services. These are recognized when the related goods are sold and the related services are rendered.

Cost of Industrial Services

Costs that are directly related to water and wastewater treatment services and are recognized when incurred.

Cost of Real Estate Sales

Costs from the sale of real estate are recognized when the buyer makes a down payment upon which the significant risks and rewards of the land are transferred.

Operating Expenses

These are expenses that are related to cost of administering and selling functions of the Group. These expenses are recognized in the Group's books when incurred.

Income Taxes

Current Income Tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Deferred Income Tax

Deferred income tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- when the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences and carryforward benefits of unused tax credits from excess minimum corporate income tax (MCIT) over regular corporate income tax and net operating loss carryover (NOLCO), to the extent that it is probable that sufficient future taxable profits will be available against which the deductible temporary differences and carryforward benefits of unused tax credits and tax losses can be utilized except:

- when the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and

- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and sufficient future taxable profits will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that sufficient future taxable profits will allow the deferred income tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred income tax relating to items recognized outside the statement of income is recognized outside the statement of income. Deferred income tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred income tax assets and liabilities are offset, if a legally enforceable right exists to offset current tax assets against current tax liabilities and deferred income taxes relate to the same taxable entity and the same tax authority.

Value-added Tax (VAT)

Revenue, expenses and assets are recognized net of the amount of VAT, except:

- where the VAT incurred on a purchase of assets or services is not recoverable from the tax authority, in which case the VAT is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables that are stated with the amount of VAT included.

The net amount of VAT recoverable from, or payable to, the tax authority is included as part of “Other current assets” or “Trade and other payables” accounts, respectively, in the consolidated balance sheet.

Enactment of New Tax Law

Republic Act No. 10963 or the Tax Reform for Acceleration and Inclusion Act (TRAIN) was signed into law on December 9, 2017 and took effect January 1, 2018. Although the TRAIN changes existing tax law and includes several provisions the generally affect businesses, the same did not have any significant impact on the consolidated financial statements.

Operating Leases

Leases where the lessor retains substantially all the risks and rewards of ownership are classified as operating leases. Payments made under operating leases are recognized in the statement of income on a straight-line basis over the period of the lease.

The determination of whether an arrangement contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent

on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after the inception of the lease only if one of the following applies:

- (a) there is a change in contractual terms, other than a renewal or extension of the arrangement;
- (b) a renewal option is exercised or extension is granted, unless that term of the renewal or extension was initially included in the lease term;
- (c) there is a change in the determination of whether fulfillment is dependent on a specified asset; or
- (d) there is a substantial change to the asset.

When a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment for scenarios (a), (c) or (d) above, and at the date of renewal or extension period for scenario (b).

When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognized.

Retirement Cost

The Parent Company has a funded, noncontributory defined benefit retirement plan, covering substantially all of its permanent employees. The Subsidiary does not have a formal retirement plan. In this case, employees who will qualify for retirement will be paid the minimum retirement under Republic Act 7641. Retirement expense is actuarially determined using the projected unit credit method. This method reflects discount rate, salary increase and average working lives of employees to the date of valuation. Retirement benefit costs comprise the following:

- service cost,
- net interest on the net defined benefit liability or asset, and
- remeasurements of net defined benefit liability or asset.

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the consolidated statement of income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in consolidated other comprehensive income (OCI) in the period in which they arise. Remeasurements are not reclassified to the consolidated statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund (other than non-transferable financial instruments issued by the reporting entity). Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a pre-tax discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of plan assets is higher than the present value of defined benefit obligation, the measurement of the

resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditures required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they are incurred. Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

Segment Information

For management purposes, the Group is organized and managed separately according to the nature of the business. These operating businesses are the basis upon which the Group reports its segment information presented in Note 6 to the consolidated financial statements.

An operating segment is a component of an entity:

- (a) that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity);
- (b) with operating results regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance; and
- (c) for which discrete financial information is available.

Earnings Per Share (EPS)

Earnings per share is computed by dividing the net income attributable to equity holders of the Group by the weighted average number of shares outstanding during the year adjusted to give retroactive effect to any stock dividends declared during the year.

Basic earnings per share is calculated by dividing the net income attributable to equity holders of the Group for the year by the weighted average number of common shares outstanding during the year.

Diluted earnings per share is computed in the same manner, adjusted for the effect of any potential dilutive shares. As the Group has no dilutive potential common shares outstanding, basic and diluted EPS are the same.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed in the notes to the consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

Events after the Reporting Date

Events after the reporting date that provide additional information about the Group's financial position at the reporting date (adjusting events), are reflected in the consolidated financial statements. Events after the reporting date that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

5. Summary of Significant Accounting Judgments, Estimates and Assumptions

The consolidated financial statements prepared under PFRSs require management to make judgments, estimates and assumptions, that affect the amounts reported in the consolidated financial statements and related notes. Future events may occur which will cause the judgments and assumptions used in arriving at the estimates to change. The effect of any change in judgments, estimates and assumptions are reflected in the consolidated financial statements as they become reasonably determinable.

Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The following items are those matters which the Group assess to have significant risks arising from judgements and estimation uncertainties.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

Classification of Property

The Group determines whether a property is classified as real estate held for sale and development, investment property or property plant and equipment based on the following:

Real estate held for sale includes land developed into a first class residential subdivision and an industrial community. Real estate held for development pertains to land that is still undeveloped.

Investment property comprises land which is not occupied for use by, or in the operations of, the Group, nor for sale in the ordinary course of business, but are held primarily for capital appreciation.

Property, plant and equipment is held for use in the supply of goods or services or for administrative purposes.

Contingencies

The Group's estimate of the probable costs for the resolution of claims and proceedings has been developed in consultation with outside counsel handling defense in these matters and is based upon an analysis of potential results. Management and its legal counsels believe that the Group has substantial legal and factual bases for its position and are of the opinion that losses arising from these legal actions, if any, will not have a material adverse impact on the Group's financial position and results of operations. It is possible, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of strategies relating to these proceedings. Management assessed that the likelihood that any liability arising from such legal actions is remote, hence, no provision for liability has been recognized in the consolidated financial statements.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Allowance for Doubtful Accounts

Allowance for doubtful accounts is determined through the specific identification. Through this method, the Group evaluates the information available that certain debtors are unable to meet their financial obligations. In this case, management uses judgment, based on the best available facts and

circumstances, including but not limited to, the length of relationship with the debtor and the debtor's current credit status based on third party credit reports and known market factors, to record specific reserves for debtors against amounts due to reduce receivable amounts to expected collection. This specific reserve is re-evaluated and adjusted as additional information received affects the amounts estimated. The amounts and timing of recorded provision for doubtful accounts for any period would differ if the Group made different assumptions or utilized different estimates.

Provisions for doubtful accounts recognized in 2018, 2017 and 2016 amounted to ₱1.2 million, ₱0.4 million and ₱1.5 million, respectively. The allowance for doubtful accounts on receivable amounted to ₱9.2 million and ₱9.1 million as at June 30, 2018 and 2017, respectively. The carrying amounts of receivables as at June 30, 2018 and 2017 amounted to ₱921.3 million and ₱762.8 million, respectively (see Note 8).

Allowance for Inventory Obsolescence

The Group provides allowance for inventories whenever NRV of inventories becomes lower than cost due to damage, physical deterioration, obsolescence, changes in price levels or other causes. The allowance account is reviewed on a monthly basis to reflect the accurate valuation in the financial records. Inventories identified to be obsolete and unusable are written-off and charged as expense for the period.

Provision for inventory obsolescence amounting to ₱0.6 million, ₱0.1 million and nil in 2018, 2017 and 2016, respectively, was recognized. Reversal of inventory obsolescence amounted to ₱2.4 million in 2016 and nil in 2018 and 2017. The carrying amounts of inventories as at June 30, 2018 and 2017 amounted to ₱235.7 million and ₱393.1 million, respectively (see Note 9).

Impairment of AFS Financial Assets

The Group treats AFS financial assets as impaired when there has been a significant or prolonged decline in the fair value below its costs or other objective evidence of impairment exists. The determination of what is "significant" or "prolonged" requires judgment. The Group generally treats a decline of 20% or more of the original cost of investments as "significant", and a period greater than six months as "prolonged". In addition, the Group evaluates other factors including normal volatility in share prices for quoted securities and the future cash flows and discounted factors for unquoted securities.

If assumptions are made regarding the duration and extent to which the fair value is less than cost, the Group would suffer an additional loss representing the write down of cost to its fair value.

No provision for impairment of AFS financial assets was recognized in 2018, 2017 and 2016. The carrying amounts of AFS financial assets as at June 30, 2018 and 2017 amounted to ₱173.9 million and ₱172.5 million, respectively (see Note 13).

NRV of Real Estate held for Sale and Development

The Group provides allowance for decline in value of real estate inventories whenever NRV of inventories becomes lower than cost due to damage, physical deterioration, change in price levels or other causes. Estimates of NRV are based on the most realizable evidence available at the time the estimates are made, of the amount the inventories are expected to realize.

There was no allowance for decline in real estate inventory value in 2018 and 2017. The carrying amounts of real estate inventories as at June 30, 2018 and 2017 amounted to ₱988.4 million (see Note 10).

Revalued Amount of Land under Property, Plant and Equipment and Fair Value of Investment Property

The Group has property, plant and equipment and investment property carried at revalued amount and fair value, respectively. These consist of land which is being valued by reference to market using comparable prices adjusted for specific market factors such as location and condition of the property. The Group engaged an external appraiser to determine revalued amount and fair value as at June 30, 2018 and 2017.

The methods and significant assumptions used by the appraiser in estimating fair values of land are discussed in Note 15. The revalued amount of land under property, plant and equipment as at June 30, 2018 and 2017 amounted to ₱810.6 million and ₱874.0 million, respectively (see Note 15). The fair value of land under investment property amounted to ₱0.2 billion and ₱1.5 billion in June 30, 2018 and 2017, respectively (see Note 15).

Estimated Useful Lives of Property, Plant and Equipment

The Group estimates the useful lives of property, plant and equipment based on the period over which the property, plant and equipment are expected to be available for use. The estimated useful lives of the property, plant and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the property, plant and equipment. In addition, the estimation of the useful lives of property, plant and equipment is based on the collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future financial performance could be materially affected by changes in the estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of the property, plant and equipment would increase the recorded expenses and decrease the noncurrent assets.

There were no changes in the estimated useful lives of property, plant and equipment in 2018, 2017 and 2016. The carrying values of property, plant and equipment carried at cost as at June 30, 2018 and 2017 amounted to ₱565.6 million and ₱503.4 million, respectively (see Note 14).

Impairment of Nonfinancial Asset

The Group assesses whether there are any indicators of impairment for property plant and equipment advances to suppliers and advances for land maintenance whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The factors that the Group considers important which could trigger an impairment review include the following:

- Significant underperformance relative to expected historical or projected future operating results;
- Significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- Significant negative industry or economic trends.

In determining the present value of estimated future cash flows expected to be generated from the continued use of the assets, the Group is required to make judgments and estimates that can materially affect the consolidated financial statements.

There were no provision for impairment losses recognized in 2018, 2017 and 2016. The fair values of land under property plant and equipment as at June 30, 2018 and 2017 amounted to ₱810.6 million and ₱874.0 million, respectively (see Note 15). The carrying amounts of property, plant and equipment carried at cost as at June 30, 2018 and 2017 amounted to ₱565.6 million and

₱503.4 million, respectively (see Note 14). The carrying amounts of advances to supplier and advances for land maintenance as at June 30, 2018 and 2017 amounted to ₱380.6 million and ₱293.9 million, respectively (see Notes 11 and 16).

Estimating Impairment of Goodwill

The Group performs impairment review on goodwill annually, or more frequently if events or changes in circumstances indicate that the carrying amount may be impaired. This requires an estimation of the value in use of the CGU to which goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the CGU and to make use of a suitable discount rate to calculate the present value of those future cash flows.

During the year ended June 30, 2018, the Group recognized impairment loss amounting to ₱199.7 million. As at June 30, 2018 and 2017, goodwill amounted to ₱502.4 million and ₱702.1 million, respectively (see Note 12).

Deferred Income Tax Assets

The Group reviews the carrying amount of deferred income tax assets at each reporting date and reduces its amount to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that sufficient future taxable profit will allow the deferred income tax asset to be recovered.

The Group's deferred income tax assets arising from temporary differences as at June 30, 2018 and 2017 amounted to ₱14.9 million and ₱26.1 million, respectively (see Note 27). Unrecognized deferred income tax assets arising from temporary differences, NOLCO and MCIT are disclosed in Note 27.

Retirement Asset

The determination of the obligation and cost for retirement is dependent on the selection of certain assumptions determined by management and used by actuaries in calculating such amounts. These include discount rate, turnover rate, mortality rate, salary increase rate and future retirement benefits increase. Due to the complexity of the valuation, the underlying assumptions, and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. While the Group believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the retirement obligation. The assumptions used are disclosed in Note 25.

Retirement income recognized in 2018, 2017 and 2016 amounted to ₱11.2 million, ₱10.8 million and ₱5.4 million, respectively (see Note 25). The carrying amounts of the Group's net retirement asset as at June 30, 2018 and 2017 amounted to ₱709.5 million and ₱339.4 million, respectively (see Note 25).

6. Segment Information

The Group's operating businesses are organized and managed according to the nature of the products and services marketed, with each segment representing a strategic business unit that offers different products and serves different markets.

The Group has operations only in the Philippines. The Group derives revenues from two main segments as follows:

Sugar and by products

This segment pertains to the production of sugar (raw and refined) and sugar by-products such as molasses, alcohol and carbon dioxide.

Real estate

This segment pertains to developing, leasing and selling real properties and other ancillary services.

| | <u>₱219,617,383</u> | <u>₱152,789,598</u> |

Advances to suppliers include payments made to suppliers for goods to be received in the future.

12. Goodwill

The Group performed its impairment review of goodwill as at June 30, 2018 and 2017. Based on the impairment review as at June 30, 2018, the carrying value of the CGU, including goodwill, exceeded the recoverable amount by ₱199.7 million, which is calculated through value in use. This was recognized as an impairment loss for the year ended June 30, 2018. As at June 30, 2017, recoverable amount exceeded the carrying value of the CGU, including goodwill, thus, no impairment loss was recognized for the year ended June 30, 2017.

CGU pertains to the Parent Company's investment in LLC. Value in use was derived using cash flow projections based on financial budgets approved by senior management covering a five-year period and the expected realization of the Group's land inventory. Cash flow beyond the five-year period are extrapolated using a 5.00% growth rate. Discount rate applied to the cash flow projections in determining value in use is 11.85% and 10.18% in 2018 and 2017, respectively.

The calculations of value in use of goodwill are most sensitive to the following assumptions:

- Discount rates - Discount rates were derived from the Group's weighted average cost of capital and reflect management's estimate of risks within the CGU. This is the benchmark used by the management to assess operating performance and to evaluate future investment proposals. In determining appropriate discount rates, regard has been given to various market information, including, but not limited to, ten-year government bond yield, bank lending rates and market risk premium and country risk premium.

- b) Growth rate estimates - The long-term rate used to extrapolate the budget for the investee companies excludes expansions and possible acquisitions in the future. Management also recognizes the possibility of new entrants, which may have significant impact on existing growth rate assumptions. Management however, believes that new entrants will not have a significant adverse impact on the forecast included in the budget.

13. Available-for-Sale Financial Assets

| | 2018 | 2017 |

15. Land

Land recognized under property, plant and equipment is carried at revalued amount of ₱810.6 million and ₱874.0 million as at June 30, 2018 and 2017, respectively.

The fair value, categorized as Level 3 in the fair value hierarchy, is based on valuations determined by an independent appraiser, accredited by the Philippine SEC, as at June 30, 2018 and 2017. The valuation models used by the appraiser are in accordance with that recommended by the International Valuation Standards Council. The current use of the land is its highest and best use.

The fair value of the land is determined using the market data (direct sales comparison) approach. Under this approach, a property's fair value is estimated based on comparable properties sold in the market against the subjected property. The weight given to this approach is dependent on the availability of recent confirmed sales of properties considered comparable to the property being appraised. These sold properties are compared property being appraised based on key units of comparison. Adjustments are made to account for identified differences against the comparables, resulting in adjusted sales values for each of the comparable.

| | ₱945,380,104 | ₱772,919,122 |

₱925.0 million Working Capital Facilities Agreement (WCFA)

The Group has an existing WCFA with BDO. Under the WCFA, the Group can avail short-term loan totaling up to ₱925.0 million at 4.25% interest rate per annum.

Promissory Notes

The promissory notes are for a period of one year with a fixed interest rate of 4%.

Total interest expense incurred for all short-term notes amounted to ₱34.9 million, ₱27.1 million and ₱11.7 million in 2018, 2017 and 2016, respectively.

Long-term Bank Notes

As at June 30, 2017, this account consists of:

| | |
|------------------------------|-----------------------|
| Local bank | ₱2,058,000,000 |
| Less deferred financing cost | 15,492,406 |
| | 2,042,507,594 |
| Less current portion | 14,420,921 |
| | ₱2,028,086,673 |

On October 15, 2014, the Group obtained a long-term interest-bearing loan from a local bank amounting to ₱2.1 billion using portion of the Group's land as collateral. Net proceeds from the loan amounted to ₱2.1 billion and transaction costs incurred amounted to ₱32.0 million which will be amortized throughout the term of the loan using the effective interest rate method. The principal of the loan will be repaid in five equal annual installments amounting to ₱21.0 million starting July 15, 2015 until July 15, 2019 and the remaining balance to be paid on October 14, 2019. The loan is equally divided into two series amounting to ₱1,050.0 million each for the purposes of interest computation. Series A incurs an interest of 5.25% per annum or PDST-R1 on the interest selling date plus a spread of 137 basis points, whichever is higher. Series B incurs an interest of 4.0% per annum of the prevailing BSP Overnight Repurchase Rate on the interest selling date plus a spread of 25 basis points, whichever is higher. As at June 30, 2018, 2017 and 2016, the interest expense related to this loan amounted to ₱83.8 million, ₱110.9 million and ₱112.0 million, respectively, including amortization of the transaction cost amounting to ₱5.0 million, ₱6.3 million and ₱6.1 million, respectively.

On April 4, 2018, the Group pre-terminated the loan from BDO Unibank for a total consideration of ₱2.4 billion which resulted to the recognition of loss on early retirement amounting to ₱10.5 million (see Note 24).

25. Retirement Cost

Parent Company

The Parent Company maintains a tax-qualified, funded, noncontributory defined benefit retirement plan covering substantially all of its permanent employees. The benefits are based on years of service and compensation during the latest year of employment. The latest retirement valuation was made as at June 30, 2018.

The fund is administered by Luisita Trust Fund (LTF) under the supervision of LTF's Board of Trustees. The Board of Trustees defines the investment strategy as often as necessary, at least annually, especially in the case of significant market developments or changes to the structure of the plan participants. When defining the investment strategy, it takes into account the plans' objectives, benefit obligations and risk capacity. The defined benefit retirement plan meets the minimum retirement benefit specified under Republic Act (RA) No. 7641, Retirement Pay Law.

| Turnover rate | A scale of 4% at age 18 decreasing to 0% at age 60 | A scale of 4% at age 18 decreasing to 0% at age 60 |
| Average working lives (in years) | 18 | 18 |

Mortality rate is based on the 2017 Philippine Intercompany Mortality table and 1994 Group Annuity Mortality Table.

The discount rate used is a single weighted average rate based on bootstrapped Philippine Dealing System Treasury Reference Rates at various tenors. Rates for intermediate durations were interpolated. The rates were then weighted by the expected benefit payments at those durations to arrive at the single weighted average discount rate.

The turnover rate represents the proportion of current plan members who will voluntarily leave the service prior to their retirement date and hence be entitled to resignation benefits instead of retirement benefits.

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the defined benefit obligation as at the end of the reporting period, assuming all other assumptions were held constant:

| | 2018 | 2017 |
|-----------------------------|--------------------|-------------|
| Discount rate | | |
| Increase of 1% | ₱28,926,252 | ₱30,914,959 |
| Decrease of 1% | 34,472,901 | 37,931,266 |
| Future salary increase rate | | |
| Increase of 1% | 34,730,436 | 38,135,060 |
| Decrease of 1% | 28,662,241 | 30,683,445 |

The overall investment policy and strategy of the Parent Company's defined benefit plan is guided by the objective of achieving an investment return which, together with contributions, ensures that there will be sufficient assets to pay retirement benefits as they fall due while also mitigating the various risk of the plans.

The Parent Company does not expect to make additional contributions to the defined benefit plan in 2019 since the plan is on a net asset position.

The average duration of the defined benefit obligation as at June 30, 2018 and 2017 is 25 and 20 years, respectively.

Shown below is the maturity analysis of the undiscounted benefit payments:

2018

| Plan Year | Expected Benefit Payments | | Total |

26. Related Party Transactions

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control or are controlled by or under common control with the Group, including holding companies, subsidiaries and fellow subsidiaries, are related parties of the Group. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Group that gives them significant influence over the enterprise, key management personnel, including directors and officers of the Group and close members of the family of these individuals, and companies associated with these individuals also constitute related parties. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

Transactions with Related Parties

The Group, in the normal course of business, has the following transactions with related parties:

| | | Year | Transactions | Outstanding Receivables (Payables) | Terms | Conditions |

28. Agreements

Milling Agreements

The Group's milling agreements with various planters provide for a 67.0% and 33.0% sharing between the planters (including related parties) and the Group, respectively, of sugar and molasses produced every crop year. As a consequence of the milling agreements and tolling contracts (for refined sugar) with planters and traders, the Group holds the sugar stock of the planters and traders for safekeeping. As at June 30, 2018 and 2017, the quantity of refined sugar held for traders is 277,646 lkg and 389,923 lkg, respectively.

Lease Agreement

In previous years, the Group transferred its main office and entered into an operating lease agreement with FLPC, effective from December 1, 2014 to November 30, 2015 (see Note 26). The lease contract includes a clause for the extension of the lease term for an additional period of three years at the option of the lessee subject to mutually acceptable rates, terms and conditions. The Group paid advance rental and security deposit amounting to ₱0.9 million and ₱0.8 million, respectively. Rental expense recognized in the consolidated statements of income amounted to ₱3.3 million and ₱3.0 million in 2018 and 2017, respectively.

29. Equity

Capital Stock

The authorized capital stock of the Parent Company is 400.0 million shares as at June 30, 2018 and 2017, with par value of ₱1 per share. The Parent Company's shares of stock were listed in the PSE on April 12, 1977. There was no active trading on the Parent Company's outstanding shares in the PSE until the Philippine SEC issued an order on January 29, 2014 lifting the order of suspension made in 2010 in relation to the registration of and permit to sell the said securities.

On June 15, 2016, the BOD of the Parent Company authorized a ten-for-one stock split to increase the number of shares of stock and decrease the par value that took effect on October 18, 2016.

| | Prior to Amendment | | | After Amendments | | |
|--------------|--------------------|------------------|-----------|--------------------|------------------|-----------|
| | Authorized Capital | Number of Shares | Par Value | Authorized Capital | Number of Shares | Par Value |
| Common Stock | 40,000,000 | 28,254,596 | ₱10.00 | 400,000,000 | 282,545,960 | ₱1.00 |

The total number of shareholders is 395 and 400 as at June 30, 2018 and 2017, respectively.

Retained Earnings

As of June 30, 2018, the balance are as follows:

| | 2018 | 2017 |
|----------------|-----------------------|--------------|
| Unappropriated | (₱104,702,606) | ₱280,932,349 |
| Appropriated | 2,300,000,000 | 200,000,000 |
| Total | ₱2,195,297,394 | ₱480,932,349 |

On June 28, 2018, the BOD reversed previously appropriated retained earnings amounting to ₱200.0 million. Also on the same date, the BOD approved the appropriation of its retained earnings amounting to ₱2.3 billion in anticipation of the following projects which are expected to happen within the next five years:

- ₱900.0 million for sugar business expansion which will cover the following:
 - intensified leasing of land for the purpose of increasing cane tonnage;
 - investment in logistics, such as additional trucks and trailers to improve delivery time;
 - upgrade of the refinery machineries and more robust yearly repairs; and
 - research and development costs to identify potential areas for improvement to increase cane tonnage to one million.
- ₱500.0 million for rum production which will cover the additional investment needed for bottling and mixing facilities to increase production capacity and costs for brand study.
- ₱900.0 million for ethanol production which will cover the construction of dehydrator equipment to bring alcohol proof grade from 94 to 99 in order to expand its existing ethanol business to petroleum companies in addition to its existing transactions with pharmaceutical companies.

Finally on June 28, 2018, the BOD declared dividends amounting to ₱50.9 million at ₱0.18 per share out of the Group's retained earnings as at March 30, 2018.

Basic/Diluted Earnings per Share

The basic/diluted earnings per share for the years ended June 30, 2018, 2017 and 2016 are computed as follows:

| | 2018 | 2017 | 2016 |
|--|---------------------|--------------|--------------|
| Net income (a) | ₱583,622,013 | ₱287,092,214 | ₱176,650,131 |
| Weighted average number of shares (b): | | | |
| Issued shares | 282,545,960 | 282,545,960 | 282,545,960 |
| Less treasury shares | 7,200 | 7,200 | 7,200 |
| | 282,538,760 | 282,538,760 | 282,538,760 |
| Basic/diluted earnings per share (a/b) | ₱2.07 | ₱1.02 | ₱0.63 |

The Group has no dilutive potential ordinary shares; hence the diluted earnings per share are the same as the basic earnings per share.

There are 7,200 shares that are in the treasury amounting to ₱7,200 as at June 30, 2018 and 2017.

30. Fair Value Measurement and Financial Instruments

The following table provides the fair value measurement hierarchy of the Group's assets that are carried at fair value:

2018

| | Fair Value Measurement Using | | | Total |
|---|---|--|--|-----------------------|
| | Quoted Prices in Active Markets (Level 1) | Significant Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | |
| Land classified as property, plant and equipment | ₱- | ₱- | ₱810,550,400 | ₱810,550,400 |
| Investment property | - | - | 223,561,380 | 223,561,380 |
| AFS financial assets - quoted | 173,787,540 | - | - | 173,787,540 |
| | ₱173,787,540 | ₱- | ₱1,034,111,780 | ₱1,207,899,320 |

2017

| | Fair Value Measurement Using | | | Total |
|---|---|--|--|-----------------------|
| | Quoted Prices in Active Markets (Level 1) | Significant Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | |
| Land classified as property, plant and equipment | ₱- | ₱- | ₱874,000,000 | ₱874,000,000 |
| Investment property | - | - | 1,486,400,000 | 1,486,400,000 |
| AFS financial assets - quoted | 172,327,748 | - | - | 172,327,748 |
| | ₱172,327,748 | ₱- | ₱2,360,400,000 | ₱2,532,727,748 |

The following are the relevant information and assumptions used in determining the fair value of land:

- *Sale/Asking price per sq. m.* This pertains to the sale/asking price per square meter based on the listing prices of comparable properties.
- *Conditions on sale of comparable properties.* This pertains to the effect of restrictions or conditions that are present in contracts of sale relating to the comparable properties.
- *Physical adjustments.* These pertain to adjustments relating to the superiority or inferiority of the Group's land as regards to location, shape, topography, size, zoning, amenities, and easement for access and utility lines.

The table below summarizes the foregoing statements. It also presents the unobservable inputs used by management in assessing the fair value of land categorized as Level 3. Management believes that this information is beneficial in evaluating the fair value of the land.

| Unobservable Inputs | Amount or Percentage of Unobservable Inputs | Relationship of Unobservable Inputs to Fair Value |
|---|---|---|
| Sale/asking price per sq.m. | ₱460 to ₱1,000 | The higher the value, the higher the fair value |
| Conditions on sale of comparable properties | 25.0% | The more onerous the conditions in contract of sale of comparable properties, the higher the fair value |
| Physical Adjustments | 50.0% | The superiority of the quality of the Group's land, the higher the fair value |

Fair value of all other assets and liabilities approximates their carrying values as at June 30, 2018 and are disclosed in their respective notes. Below are the descriptions of the Group's financial instruments that are carried in the consolidated financial statements as at June 30, 2018 and 2017.

Cash and Cash Equivalents, Receivables, Short-term Notes Payable and Trade and Other Payables
Due to the short-term nature of these financial instruments, their fair values approximate the carrying amounts as at reporting date.

AFS Financial Assets

The fair value of the listed AFS financial assets are determined in reference to quoted market bid prices at the close of business on the reporting date since these are mostly actively traded in organized financial market. Investments in shares of stock that are not listed have no other reliable sources of their fair market values, therefore, they are stated at cost.

Notes Payable

The carrying value of notes payable with variable interest rates approximates their fair value because of semi-annual or quarterly resetting of interest rate based on market conditions. The fair values of notes payable with fixed interest rates based on Level 3 are determined based on estimated cash flows with discount rates ranging from 4.8% to 6.0% as at June 30, 2018 and 2017, respectively.

As of June 30, 2017, the fair value and carrying amount of the Group's notes payable amounts to ₱2.0 billion.

The Group's policy is to recognize transfers into and transfers out of fair value hierarchy levels as at the date of the event or change in circumstances that caused the transfer. There have been no assets and liabilities transferred between Level 1, Level 2 and Level 3 during the period.

31. Financial Risk Management Objectives and Policies

The Group's principal financial instruments include cash and cash equivalent, AFS financial assets and notes payable. The main purpose of these financial instruments is to finance the Group's operations. The Group has various other financial assets and liabilities such as receivables and trade and other payables, which arise directly from its operations.

The main risks arising from the Group's financial instruments are liquidity risk, credit risk and interest rate risk. The BOD reviews and agrees on the policies for managing each of these risks and these are summarized below:

Liquidity Risk

Liquidity risk is the risk that the Group will not be able to settle or meet its obligations on time or at reasonable prices. The Group uses cash flow approach in managing its liquidity, in this way, funding requirements under normal economic condition are met.

The table below summarizes the maturity profile of the Group's financial liabilities based on undiscounted payments:

Credit Risk

Credit risk is the risk that counterparty will not meet its obligation under a financial instrument leading to a financial loss. The Group imposes cash basis approach in its sales transaction to lower exposure to credit risk.

With respect to credit risk arising from other financial assets of the Group, which comprise cash and cash equivalents, receivables and AFS financial assets, exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of these instruments as stated below:

| | 2018 | 2017 |
|--|-----------------------|-----------------------|
| Cash and cash equivalents | ₱355,179,298 | ₱238,194,857 |

Credit Quality of Financial Assets

The credit quality of financial assets is managed by the Group using high grade and standard grade as internal credit ratings.

High Grade. This pertains to counterparty who is not expected by the Group to default in settling its obligations, thus, credit risk exposure is minimal. This normally includes large prime financial institutions, companies, government agencies and individual buyers. Credit quality was determined based on the credit standing of the counterparty.

Standard Grade. Other financial assets not assessed as high grade financial assets are included in this category.

Interest Rate Risk

Interest rate risk arises from the possibility that the changes in interest rates will affect the fair value of financial instruments. Interest on financial instruments is fixed until the maturity of the instrument. The Group's financial instruments with fixed interest rate exposes the Group to fair value interest rate risk. The changes in market interest rate will not have an impact on the Group's consolidated statements of income.

Capital Management

The Group's primary objective is to ensure that it maintains a strong credit rating and healthy capital ratios to sustain its business and maximize shareholder value. The Group manages its capital structure based on its business requirements and the economic environment. The Group monitors capital using a gearing ratio, which is total debt divided by total debt and equity. Total debt includes notes payable and trade and other payables. Equity includes capital stock, retained earnings, revaluation increment, unrealized cumulative gain on AFS financial assets and treasury stock.
